

# Table of contents

<b>List of figures</b>	<b>xxiii</b>
<b>List of tables</b>	<b>xxv</b>
<b>Nomenclature</b>	<b>xxviii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 What are Social Media? . . . . .	1
1.2 Why do we use Social Media? . . . . .	3
1.2.1 Use of Social Media in E-governance . . . . .	7
1.2.2 Social Media during Elections . . . . .	8
1.2.3 Social Media during Disaster Management . . . . .	9
1.3 Motivation and Challenges . . . . .	10
1.4 Dissertation Overview . . . . .	12
1.5 Research Goals . . . . .	13
1.6 Contribution and Impact . . . . .	14
1.6.1 A study on use of SM by Indian ministries . . . . .	15
1.6.2 A study on people's opinions during IGE 2019 . . . . .	16
1.6.3 A study on people's reaction during IGE 2019 . . . . .	17
1.6.4 A study on COVID-19 . . . . .	18
1.7 Structure of the Thesis . . . . .	19

---

<b>2</b>	<b>Literature Review</b>	<b>21</b>
2.1	Use of Social Media in e-governance . . . . .	22
2.2	Social Media during Elections . . . . .	26
2.3	Use of Social Media in Disaster Management . . . . .	31
2.3.1	Extraction . . . . .	33
2.3.2	Event Detection . . . . .	39
2.3.3	Summarization . . . . .	41
2.3.4	Classification . . . . .	43
<b>3</b>	<b>Background</b>	<b>47</b>
3.1	Information Retrieval . . . . .	47
3.1.1	Hyperlink-Induced Topic Search (HITS) Algorithm . . . . .	50
3.1.2	Latent Dirichlet Allocation (LDA) . . . . .	51
3.2	Traditional Machine Learning . . . . .	53
3.2.1	Support vector machine . . . . .	53
3.2.2	Multinomial Naive-Bayes (MNB) . . . . .	54
3.2.3	Stochastic Gradient Descent (SGD) . . . . .	55
3.2.4	Linear Regression (LR) . . . . .	56
3.2.5	Random Forest . . . . .	56
3.2.6	Decision Tree . . . . .	57
3.2.7	XG Boost . . . . .	57
3.2.8	k-Nearest Neighbour (kNN) . . . . .	58
3.3	Deep Learning . . . . .	58
3.3.1	Convolutional Neural Network . . . . .	59
3.3.2	BiLSTM . . . . .	61
3.4	Transfer Learning . . . . .	62
3.5	Distributional Vector Representation . . . . .	64

---

3.5.1	Context Independent Embedding . . . . .	65
3.5.2	Context Dependent Embedding . . . . .	65
<b>4</b>	<b>A study on use of SM by Indian ministries</b>	<b>69</b>
4.1	Short title . . . . .	69
4.1.1	Twitter . . . . .	70
4.1.2	Facebook . . . . .	70
4.1.3	Social Media in Governance . . . . .	71
4.2	Contributions of Chapter . . . . .	72
4.2.1	Data Collection . . . . .	73
4.3	Content Analysis . . . . .	75
4.4	Level of Activities of different Government Ministries . . . . .	78
4.4.1	Time-Series Analysis . . . . .	80
4.4.2	Moderate Active Group . . . . .	81
4.4.3	High Active Group . . . . .	82
4.4.4	Super Active Group . . . . .	83
4.5	Inter-connection among ministries . . . . .	84
4.5.1	Hub and Authority scores . . . . .	85
4.5.2	PageRank (PR) . . . . .	86
4.6	Public Participation . . . . .	87
4.6.1	Likes . . . . .	88
4.6.2	Followers . . . . .	90
4.7	Influence of Social media and public opinion in Government . . . . .	93
4.8	Summary . . . . .	94
<b>5</b>	<b>A study on people's opinions during PEI 2019</b>	<b>97</b>
5.1	Short title . . . . .	97

---

5.2	Contribution . . . . .	98
5.2.1	Multi-task learning with the convolution network (MTL-CN) . . . . .	99
5.3	Experimental Setup . . . . .	103
5.3.1	Datasets . . . . .	104
5.3.2	Pre-processing . . . . .	106
5.3.3	Implementation details . . . . .	107
5.4	Results and Analysis . . . . .	107
5.4.1	Effect of $\alpha$ -value . . . . .	109
5.5	Summary . . . . .	111
<b>6</b>	<b>A study on people’s reaction during IGE 2019</b>	<b>113</b>
6.1	Short title . . . . .	113
6.2	Contribution . . . . .	115
6.2.1	Characteristics of posts . . . . .	115
6.2.2	Annotations . . . . .	117
6.2.3	Preprocessing . . . . .	117
6.3	Models . . . . .	118
6.3.1	Machine Learning . . . . .	118
6.3.2	Deep Learning . . . . .	120
6.4	Our Approaches . . . . .	123
6.4.1	Ensemble of Machine Learning techniques (EMLT) . . . . .	124
6.4.2	Ensemble of BERT and ELMo models (EBEM) . . . . .	125
6.4.3	Domain adaptation on each ensemble setting (EMLT and EBEM) . . . . .	125
6.5	Results and Analysis . . . . .	126
6.5.1	Performance of ML techniques . . . . .	127
6.5.2	Performance of deep learning techniques . . . . .	128
6.5.3	Performance of ensembling techniques . . . . .	129

---

6.5.4	Results of Domain Adaptation . . . . .	130
6.6	Summary . . . . .	131
<b>7</b>	<b>Sentiment Analysis on Hindi Tweets during COVID-19 Pandemic</b>	<b>133</b>
7.1	Short title . . . . .	133
7.2	Contributions . . . . .	136
7.2.1	Annotation . . . . .	137
7.2.2	Data Statistics . . . . .	137
7.3	Methods . . . . .	138
7.3.1	BERT . . . . .	139
7.3.2	FastText . . . . .	141
7.3.3	Self-attention . . . . .	141
7.3.4	BiLSTM with BERT + Fasttext . . . . .	142
7.3.5	BiLSTM+ fastText with self attention . . . . .	143
7.3.6	BiLSTM with fastText . . . . .	143
7.4	Experiments . . . . .	144
7.4.1	Pre-processing . . . . .	144
7.4.2	Benchmark Systems . . . . .	145
7.5	Results . . . . .	147
7.6	Summary . . . . .	149
<b>8</b>	<b>Discussion And Conclusion</b>	<b>151</b>
8.1	Discussion . . . . .	151
8.2	Summary and Contributions . . . . .	152
8.2.1	<b>RQ1: What roles do SM play in e-Governance and the public interaction with the government?</b> . . . . .	152

8.2.2	<b>RQ2:</b> How politics affect society (A study on people’s opinions during PEI 2019)? . . . . .	155
8.2.3	<b>RQ3:</b> How do people react to political campaigns? . . . . .	156
8.2.4	<b>RQ4:</b> How disaster affect people’s life (A study on COVID-19)? .	157
8.3	Conclusion . . . . .	157
8.3.1	<b>RQ1:</b> What roles do SM play in e-Governance and the public interaction with the government? . . . . .	158
8.3.2	<b>RQ2:</b> How politics affect society (A study on people’s opinions during IGE 2019)? . . . . .	158
8.3.3	<b>RQ3:</b> How do people react to political campaigns? . . . . .	159
8.3.4	<b>RQ4:</b> How disaster affect people’s life ( A study on COVID-19)?	160
8.4	Future Scopes . . . . .	160
