Abstract **iii**

List of Tables **ix**

List of Figures **xi**

1 Introduction **1**

1.1 Research Gap and Research Goal 5

1.2 Motivation 6

1.3 Contributions 7

1.4 Thesis outline 8

2 Preliminaries and Literature Survey **10**

2.1 Preliminaries 10

2.2 Literature survey 12

2.2.1 Order preference model 12

2.2.2 Flexible size preference model 13

2.2.3 Group Recommender Systems 18

2.2.4 Memory-based approaches in group recommendation 19

2.2.5 Model-based approaches in group recommendation 20

2.2.6 Group formation in group recommendations 22

3 Automatically detecting groups using locality-sensitive hashing in group recommendations **27**

3.1 Problem definition and model overview 28

3.2 Proposed Model 28

3.2.1 MinHash technique 28

3.2.2 Locality-sensitive hashing for finding the candidate pairs of users . . 32
3.3 Experimental setup and Result analysis 38
3.3.1 Experimental setup and data preparation 38
3.3.2 Results and analysis 40
3.4 Summary 46

4 OPHAencoder: An unsupervised approach to identify groups in group recommendations 48

4.1 Proposed work 48
4.1.1 One permutation hashing 50
4.1.2 Autoencoder 53
4.1.3 OPHAencoder 54
4.2 Experimental setup and result analysis 56
4.2.1 Pre-processing step: 57
4.2.2 Group formation step: 57
4.2.3 Recommendation step: 58
4.2.4 Baseline and state-of-the-art models: 59
4.2.5 Results and analysis 60
4.3 Summary 66

5 Auto-detecting groups based on textual similarity for group recommendations 67

5.1 Methodology 68
5.1.1 Model 1 68
5.1.2 Model 2 69
5.1.3 Model 3 70
5.1.4 Cluster validation 73
5.2 Experimental setup and result analysis 76
5.2.1 Pre-processing step: 77
5.2.2 Group formation step: 77
5.2.3 Recommendation step: 78
5.2.4 Results and discussions 79
5.2.5 Baseline and state-of-the-art models: 81

5.3 Summary 83

6 A study on the role of uninterested items in group recommendations 85

6.1 Models 88

6.1.1 Proposed models 88

6.1.2 Automatically identified group 93

6.2 Results and discussions 98

6.2.1 Experimental setup and data-preprocessing 98

6.2.2 Results and analysis 99

6.3 Summary 109

7 Conclusion and Future directions 110

A List of Publications 112

A.1 Journal Papers 112

A.1.1 Published Papers 112

A.1.2 Communicated papers 113
