

List of Tables

Table 1.1.	Solar Energy advantages and disadvantages	17
Table 2.1.	Cuk Converter equations under Switch ON and OFF situations....	40
Table 2.2.	Electrical specifications of Jindal Solar one module	43
Table 2.3.	Global Energy Mix by 2050 to achieve 450 ppm CO ₂ e.....	45
Table 3.1.	Solar Insolation Components calculation.....	52
Table 3.2.	Comparison between established ASHRAE and MEINEL models...	53
Table 3.3.	Time / Date Dependence of Sun Orbit Parameters	55
Table 3.4.	Module MATLAB Code realization	60
Table 3.5.	Comparison of Power Consumption Propagation methods	61
Table 3.6.	Design parameters of prototype system	66
Table 4.1.	Design parameters for prototype system	72
Table 4.2.	Results of Preliminary CO ₂ tolerance with Microalgae culture.....	75
Table 4.3.	Algal Energy-Mass balance for the conversion	79
Table 4.4.	Costing of NG based Crude Oil Heating system at ONGC.....	79
Table 4.5.	Design of Solar and Biomass hybrid system	80
Table 5.1.	Objective and design requirements of Cuk Converter.....	82
Table 5.2.	Cuk Converter design parameters formulae	82
Table 5.3.	Parameters of devices from the First & Second group	85
Table 5.4.	Dispatcher functional methodology for the First & Second group.	85
Table 5.5.	Device parameters for six parameters	90
Table 5.6.	Cost detailing of NG based Crude Oil Heating in ONGC	99
Table 5.7.	Hybrid System-Economic analysis and comparison	100
Table 5.8.	Selection of suitable technology for crude oil heating.....	102
