<b>List of Figures</b>	viii-xiv
<b>List of Tables</b>	xv
<b>List of Abbreviations / Symbols</b>	xvi-xvii
<b>Preface</b>	xviii-xxi
<b>Chapter – 1 Introduction &amp; Literature Survey</b>	<b>1-32</b>
1.1. Introduction	1
1.2. Organic semiconductors	2
1.2.1. $\pi$ -conjugated materials	3
1.2.2. Ionization and generation of polaron, bipolaron, and solitons in conjugated polymers	5
1.2.3. Charge injection mechanisms	9
1.2.3.1. Chemical doping	9
1.2.3.2. Optical excitation	10
1.2.3.3. Carrier injection from electrode	10
1.2.4. Charge transport in semiconductor bulk	11
1.2.5. Charge transport within organic devices	13
1.2.5.1. Schottky barrier diode configuration	15
1.2.5.2. Organic field effect transistor configuration	16
1.2.5.3. Organic phototransistor configuration	19
1.2.6. Polythiophenes (PTs)	21
1.2.7. Molecular packing and orientation	23
1.2.8. Electrical anisotropy in $\pi$ -conjugated polymers	24
1.3. Processing of $\pi$ -conjugated polymers for electronic applications	27
1.3.1. Thin film fabrication methods	27
1.3.2. Molecular ordering enhancement approaches	29
1.3.3. Floating-film Transfer Method	30
1.4. Objective of thesis	32
<b>Chapter – 2 Experimental and Instrumentations</b>	<b>33-55</b>
2.1. Introduction	33
2.2. Experimental	33
2.2.1. Materials	33

## *Content*

---

---

2.2.2.	Preparation of pristine semiconducting polymer ink	34
2.2.3.	Synthesis of PBTTT/DPPCN hybrid polymer ink	34
2.2.4.	Floating film fabrication methods	34
2.2.4.1.	Conventional floating film transfer method	35
2.2.4.2.	Solvent vapor-assisted floating film transfer method	36
2.2.4.3.	Subphase modified floating film transfer method	38
2.3.	Characterizations	39
2.3.1.	Surface characterizations	39
2.3.1.1.	Atomic force microscopy	39
2.3.2.	Structural and morphological characterizations	41
2.3.2.1.	X-ray Diffractometer (XRD)	42
2.3.2.2.	Transmission electron microscopy and selected area electron diffraction	43
2.3.3.	Optical characterizations	45
2.3.3.1.	UV-Visible Spectroscopy	46
2.3.4.	Electrochemical characterizations	48
2.3.4.1.	Cyclic Voltammetry (CV)	48
2.4.	Device fabrication and electrical characterizations	50
2.4.1.	Substrate cleaning	50
2.4.2.	Surface treatment	51
2.4.3.	FTM film coating	52
2.4.4.	Electrode deposition using a thermal evaporator	52
2.4.5.	Device measurements	54
<b>Chapter – 3</b>	<b>Evolution of Edge-On Oriented Polymer Films Self-Assembled at the Air–Liquid Interface for High-Performance Electronic Device Applications</b>	<b>56-77</b>
3.1.	Introduction	56
3.2.	Results and Discussion	58
3.2.1.	Film growth mechanism	58
3.2.2.	Thin film characterizations	61
3.2.3.	Charge transport study	71
3.3.	Conclusions	76
<b>Chapter – 4</b>	<b>Solvent Vapor Assisted Self-Assembly of Semiconducting Polymers at the Air-Liquid Interface: Impact on Nanoscale Morphology and Optoelectrical Anisotropy</b>	<b>78-98</b>

## *Content*

---

4.1.	Introduction	78
4.2.	Results and Discussion	80
4.2.1.	Film formation mechanism	80
4.2.2.	Thin film characterizations	82
4.2.3.	Charge transport study	95
4.3.	Conclusions	98
<b>Chapter – 5</b>	<b>Improving vertical charge transport in organic Schottky diodes via Interface engineering of large-area conducting polymer thin films fabricated on hydrophilic liquid surface of tunable surface energy</b>	<b>99-120</b>
5.1.	Introduction	99
5.2.	Results and Discussion	102
5.2.1.	Thin film characterizations	102
5.2.2.	Charge transport study	109
5.2.3.	Theoretical interpretation of SM-FTM	115
5.3.	Conclusions	119
<b>Chapter – 6</b>	<b>Investigation of Synergistic effect in PBTTT/DPPCN hybrid material towards enhancing the field effect mobility and Photosensitivity</b>	<b>121-139</b>
6.1.	Introduction	121
6.2.	Results and Discussion	123
6.2.1.	Characterizations of hybrid polymer ink	123
6.2.2.	Characterizations of FTM films	126
6.2.3.	Anisotropic charge transport	129
6.2.4.	Validation of electrical results	132
6.2.5.	Photo-response study	137
6.3.	Conclusions	138
<b>Chapter – 7</b>	<b>Summary and Future Work</b>	<b>140-142</b>
	<b>References</b>	<b>143-160</b>
	<b>List of Publications</b>	<b>161-163</b>
