Abstract	xxvii-xxx
1. Introduction	1-10
1.1 Motivation	1
1.2 Biofuels	2
1.3 Water emulsion fuels	4
1.4 Nano fuels	6
1.5 Contribution of the study	7
1.6 Thesis structure	8
2. Literature review	11-36
2.1 Preparation of biofuels, their blends, and there application in CI engines	11
2.2 Preparation of water emulsion fuels, and their application in CI engines	18
2.3 Preparation of nano emulsion fuels, and their application in CI engines	23
2.4 Application of Taguchi-grey experimental design and optimization technique	28
2.5 Highlights	33
2.6 Research gaps and Scope	34

2.7	Objectives of the current study	35
3. Fuel preparation, thermophysical properties measurement and characterization		37-48
3.1	Preparation of Fuels	37
3.1.1.	Preparation of orange peel biodiesel, sal oil biodiesel and its blend	37
3.1.2.	Preparation of water emulsified fuel with diesel	39
3.1.3.	Preparation of water emulsified orange peel biodiesel (OPB) and Sal oil biodiesel (SOB) diesel blend fuel with and without nano additive	40
3.2	Thermo-physical properties measurement	42
3.3	Morphology characteristic analysis for Al ₂ O ₃ and CNT nano additive	45
3.4	Highlights	46
4. Taguchi design of experiment, experimental methodology, and grey relational optimization		49-66
4.1	Taguchi design of experiment	49
4.2	Experimental setup and Methodology	53
4.2.1.	Experimental setup	53
4.2.2.	Experimental methodology	55
4.3	Mathematical Modelling	56
4.4	Taguchi-grey relational analysis	58
4.4.1.	Signal to noise ratio (S/N ratio) analysis	58
4.4.2.	Grey relational analysis	60
4.5	Uncertainty analysis	62
4.6	Highlights	64
5. Analysis and optimization of diesel engine performance and emission parameters with OPB, SOB, & WiDE fuels		67-130

5.1 Analysis of diesel engine performance and emission parameters fuelled with OPB blended fuel	68
5.2 Analysis of diesel engine performance and emission parameters fuelled with SOB blended fuel	80
5.3 Analysis of diesel engine performance and emission parameters fuelled with water in diesel emulsion (WiDE) fuel	91
5.4 Analysis of diesel engine performance and emission parameters fuelled with water emulsified OPB blended nano additive incorporated fuel	102
5.5 Analysis of diesel engine performance and emission parameters fuelled with water emulsified SOB blended nano additive incorporated fuel	114
5.6 Highlights	126
6. Optimization of diesel engine energy, exergy, and emission parameters with OPB, SOB, WiDE& nano fuels	131-184
6.1 Optimization of diesel engine performance and emission parameters fuelled with OPB blended fuel	131
6.2 Optimization of diesel engine performance and emission parameters fuelled with SOB blended	140
6.3 Optimization of diesel engine performance and emission parameters fuelled with water in diesel emulsion fuel	148
6.4 Optimization of diesel engine performance and emission parameters fuelled with water emulsified OPB blended nano additive incorporated fuel	156
6.5 Optimization of diesel engine performance and emission parameters fuelled with water emulsified SOB blended nano additive incorporated fuel	164
6.6 Optimization of diesel engine performance and emission parameters fuelled with water emulsified POB blended and SOB blended CNT nano additive incorporated fuel	172

6.7 Highlights	180
7. Concluding remarks and future scope	185-188
9.1 Conclusions	185
9.2 Future scope	188
References	189-208
Appendix A	209-213
Appendix B	214-219
Appendix C	220-225
