

LIST OF TABLES

Table 1.1:	Nanostructure Materials Classification and Properties.	3
Table 1.2:	Comparison of EBE and SG TF Deposition Techniques.	13
Table 1.3:	Physical parameters of Titanium Dioxide and Silicon.	26
Table 1.4:	Characterization of TiO ₂ based Heterojunction devices as reported by current researchers.	38
Table 2.1:	Comparison of AFM Derived Parameters.	68
Table 2.2:	Comparison of electronic parameters for TiO ₂ TFs under consideration.	81
Table 2.3:	Parameters of Si/TiO ₂ heterojunction diode Under Dark condition.	90
Table 2.4:	Comparison of the UV photo detection parameters for two p-Si/n-TiO ₂ heterojunction photodiodes under study.	94
Table 3.1:	Temperature-Dependent (<i>I-V-T</i>) Electrical Parameters of n-TiO ₂ /p-Si TF Heterojunction Diodes.	105
Table 4.1:	AFM derived parameters for as-grown p-SiNWs.	133
Table 4.2:	Comparison of AFM Derived Parameters for two deposition techniques under consideration.	139
Table 4.3:	Comparison of Debye-Sheerer and Williamson–Hall derived XRD analyses results.	146
Table 4.4:	Electrical parameters of SiNWs/TiO ₂ heterojunction diode Under Dark condition.	155
Table 4.5:	Comparison of the UV photo detection parameters for two present p-SiNWs/n-TiO ₂ heterojunction photodiodes under study.	160
Table 4.6:	Comparison of Different UV Detection Parameter For TiO ₂ Based UV Detector.	161
