Chapter 1 Introduction

1.1 Fundamentals of Composite materials	1
1.2 Classification of Composite materials based on Reinforcement	6
1.2.1 Fiber-reinforced composites	6
1.2.1.1 Short or discontinuous fiber composites	7
1.2.1.2 Long or continuous fiber composites	7
1.2.2 Particulate reinforced composites	8
1.3 Natural fiber Reinforced Composites	8
1.4 Opportunities for natural fiber-reinforced composites	10
1.5 Organization of Thesis	12

Chapter 2 Literature review

2.1	Natural fibers and NFRPCs	15
2.1.1	Structure of plant fiber	16
2.1.2	Chemical constituents of natural fiber	19
2.2	Concerns of using natural cellulose fibers in composites	20
2.2.1	Interfacial bonding between the fiber and the polymer matrix	20
2.2.2	Thermal stability of natural fibers	21
2.2.3	Moisture absorption behaviour of plant fibers	22
2.3	Chemical modification of fiber surface	22
2.4	Mechanical, physical, water absorption and thermal properties of natural fiber reinforced polymer composites	26
2.5	Tribological properties of natural fiber reinforced polymer composites	31
2.6	Traditional and Eco-friendly chemicals used in the present study to modify the fiber surface	36
2.6.1	Sodium hydroxide treatment	36
2.6.2	Glutamic acid treatment	36
2.6.3	Sodium hydrogen carbonate treatment	37
2.6.4	Sodium carbonate treatment	37
2.6.5	Hydrogen peroxide treatment	37
2.6.6	Polylactic acid (PLA) and polyhydroxybutyrate (PHB) coating	38
2.6.7	Sodium citrate treatment	38
2.6.8	Stearic acid treatment	39
2.7	The research gap from the literature reviews	39
2.8	Objectives of the present works	40

Chapter 3 Materials and Methods

3.1	Matrix material	42
3.2	Natural fibers employed in the present study	43
3.2.1	Fiber material - 1: (Hemp fiber)	43
3.2.2	Fiber material - 2: (Sisal fiber)	44
3.2.3	Fiber material - 3: (Jute fiber)	44
3.3	Surface treatment of hemp fiber	45
3.3.1	Sodium carbonate treatment	45
3.3.2	Hydrogen peroxide treatment	46
3.4	Biodegradable polymer coating of hemp fiber	46
3.4.1	PHB coating of fibers	46
3.4.2	PLA coating of fibers	47
3.5	Surface modification of sisal fiber	47
3.5.1	NaOH treatment	47
3.5.2	Glutamic acid treatment	47
3.5.3	Combination treatment	48
3.5.4	Stearic acid treatment	48
3.5.5	Sodium citrate treatment	49
3.6	Jute fiber surface treatment	49
3.6.1	Sodium hydroxide treatment	49
3.6.2	Sodium carbonate treatment	49
3.6.3	Sodium hydrogen carbonate treatment	50
3.7	Physical and thermal characterization of natural fibers	50
3.7.1	Scanning electron microscopy (SEM)	50
3.7.2	Fourier transform infrared spectroscopy (FTIR)	50

3.7.3	X-Ray diffraction (XRD)	50
3.7.4	Thermogravimetric analysis (TGA)	51
3.7.5	Differential scanning calorimetry (DSC)	51
3.8	Composite fabrication	52
3.8.1	Composite fabrication -1:(Hemp fiber reinforced epoxy composites)	52
3.8.2	Composite fabrication -2:(Sisal fiber reinforced epoxy composites)	53
3.8.3	Composite fabrication -3:(Jute fiber reinforced epoxy composites)	54
3.9	Water absorption, mechanical and tribological tests of the composites	55
3.9.1	Water absorption test	55
3.9.2	Tensile test	55
3.9.3	Flexural test	55
3.9.4	Impact test	56
3.9.5	Short beam shear test	56
3.9.6	Vickers microhardness test	57
3.9.7	Dry sliding wear test	57
3.10	Surface morphology tests	58

Chapter 4 Results and Discussion:

Physical & Thermal Characterization of Natural Fibers

4.1	Scanning electron microscopy (SEM)	60
4.1.1	SEM analysis of hemp fibers	60
4.1.2	SEM analysis of sisal fibers	62

4.1.3	SEM analysis of jute fibers	64
4.2	Fourier transform infrared spectroscopy (FTIR)	65
4.2.1	FTIR analysis of hemp fibers	65
4.2.2	FTIR analysis of sisal fibers	67
4.2.3	FTIR analysis of jute fiber	69
4.3	X-Ray diffraction (XRD)	71
4.3.1	XRD analysis of hemp fibers	71
4.3.2	XRD analysis of sisal fibers	74
4.3.3	XRD analysis of jute fibers	76
4.4	Thermal characterization of fibers	77
4.4.1	Thermogravimetric analysis (TGA) of sisal fibers	77
4.4.2	Differential scanning calorimetry (DSC) analysis of sisal fibers	79

Chapter 5 Results and Discussion:

Water absorption, Mechanical and Tribological Properties of Natural Fiber Reinforced Epoxy Composites

5.1	Water absorption properties of the natural fiber reinforced epoxy composites	81
5.1.1	Influence of chemical treatment on water absorption properties of HFREC	81
5.1.2	Effect of fiber coatings on water absorption properties of HFREC	82
5.1.3	Influence of glutamic acid treatment on the moisture retention properties of SFREC	83

5.1.4	Influence of chemical treatment on water absorption characteristics of JFREC	85
5.2	Mechanical properties of natural fiber reinforced epoxy composites	86
5.2.1	Influence of chemical treatment on tensile properties of HFREC	86
5.2.1.1	SEM micrographs of tensile fractured surfaces of composites	89
5.2.2	Effect of fiber coatings on tensile properties of HFREC	90
5.2.2.1	Scanning electron microscopy analysis of tensile fracture surfaces	91
5.2.3	Influence of chemical treatment on tensile properties of SFREC	92
5.2.3.1	Scanning electron microscopy analysis of tensile fracture surfaces	95
5.2.4	Influence of chemical treatment on tensile properties of JFREC	96
5.2.4.1	Scanning electron microscopy analysis of tensile fracture surfaces	98
5.2.5	Influence of chemical treatment on flexural properties of SFREC	99
5.2.5.1	Scanning electron microscopy analysis of flexural fracture surfaces	100
5.2.6	Influence of glutamic acid coating on flexural properties of SFREC	102
5.2.6.1	Scanning electron microscopy analysis of flexural fracture surfaces of SFREC	103
5.2.7	Effect of fiber coatings on impact properties of HFREC	104
5.2.8	Effect of glutamic acid coatings on impact properties of SFREC	105
5.2.9	Influence of chemical treatment on impact properties of JFREC	105
5.2.10	Influence of chemical treatment on Inter-laminar shear strength (ILSS) properties of SFREC	106
5.2.11	Influence of chemical treatment on micro-hardness properties of HFREC	109

5.2.12	Effect of fiber coatings on micro-hardness properties of HFREC	109
5.2.13	Effect of glutamic acid coatings on the micro-hardness properties of SFREC	110
5.3	Tribological properties of natural fiber reinforced epoxy composites	110
5.3.1	Effect of operating parameters and chemical treatment on tribological properties of HFREC	111
5.3.1.1	Speicific wear rate	111
5.3.1.2	Coefficient of friction	113
5.3.1.3	SEM analysis of worn surface	116
5.3.2	Effect of operating factors and fiber coatings on tribological properties of HFREC	117
5.3.2.1	Specific wear rate	117
5.3.2.2	Coefficient of friction	119
5.3.2.3	Scanning electron microscopy analysis of worn surface	122
5.3.3	Effect of operating parameters and chemical treatment on tribological properties of SFREC	124
5.3.3.1	Friction and wear	124
5.3.3.2	SEM analysis of wear surface	127
5.3.4	Effect of operating parameters and chemical modification on tribological properties of JFREC	128
5.3.4.1	Specific wear rate	128
5.3.4.2	Coefficient of friction	130
5.3.4.3	SEM micrographs of worn surfaces of composites	133

Chapter 6 Conclusions and Future Scopes

6.1	Physical and thermal characterization of natural fibers	136
6.1.1	Physical characterization of chemically treated hemp fibers	136
6.1.2	Physical characterization of polymer coated hemp fibers	137
6.1.3	Physical characterization of glutamic acid treated sisal fibers	137
6.1.4	Physical and thermal characterization of chemically treated sisal fibers	137
6.1.5	Physical characterization of chemically treated jute fibers	138
6.2	Water absorption, mechanical and tribological properties of natural fiber reinforced epoxy composites.	138
6.2.1	Water absorption and mechanical properties of chemically treated HFREC	138
6.2.2	Water absorption and mechanical properties of polymer coated HFREC	139
6.2.3	Water absorption and mechanical properties of glutamic acid treated SFREC	140
6.2.4	Mechanical properties of eco-friendly chemically treated SFREC	141
6.2.5	Water absorption and mechanical properties of chemically treated JFREC	142
6.2.6	Tribological properties of chemically treated HFREC	142
6.2.7	Tribological properties of polymer coated HFREC	142
6.2.8	Tribological properties of eco-friendly chemically treated SFREC	143
6.2.9	Tribological properties of chemically treated JFREC	143
6.2	Recommendation for further research	144
