LIST OF ABBREVIATIONS	XXI
PREFACE	XXVII
CHAPTER 1 INTRODUCTION	1
1.1 Introduction	1
1.2 Classification of Tube hydroforming process based on sensitivity to loading parameters	1
1.3 The main components of tube hydroforming systems	4
1.3.1 Hydraulic Powerpack Systems (Press)	4
1.3.2 Die and Tooling	5
1.3.3 Pressure system	7
1.3.4 Axial hydraulic cylinders and plungers	8
1.4 Motivation and research objective	9
1.5 Thesis layout	10
CHAPTER 2 LITERATURE REVIEW	11
2.1 Introduction	11
2.2 Analytical studies	11
2.3 Finite element modeling	14
2.4 Investigation of the factors affecting the process output	18
2.4.1 Effect of material properties on the process output:	18
2.4.2 Effect of geometrical factors on the process output	20
2.4.3 Effect of process parameters on the process output	22

2.4.4	Effect of friction and lubricating on the process output	25
2.5	Instabilities and failures	28
2.5.1	Instabilities overview	29
2.5.2	Forming limit diagrams (FLD)	30
2.5.3	Improvements resulting in delayed bursting	32
2.6	Summary	34
CHAPTER 3 EXPERIMENTAL DESIGN AND FABRICATION		37
3.1	Introduction	37
3.2	Essentials factors of product design	39
3.2.1	Need Analysis:	40
3.2.2	Physical Realizability:	40
3.2.3	Design stages:	40
3.2.4	Feasibility Study:	40
3.2.5	Detailed design:	41
3.3	Design of Tube hydroforming Test-Setup	41
3.4	Theoretical Study	42
3.5	Fabrication of Test Setup	44
3.6	Experimental setup and analysis	60
3.7	Experimental Results and Data	61
CHAPTER 4 SIMULATION OF TUBE HYDROFORMING PROCESS		65
4.1	Introduction	65
4.2	Concepts of time	68
4.3	Contact analysis	69
4.4	Loading path determination	69
4.5	Simulation study and component modeling	70
4.5.1	CAE Simulation:	70
4.5.2	Simulation Steps	71
4.5.3	Simulation of Tube Hydroforming machine using FEA	72
4.5.4	Plasticity Model and Boundary Conditions	72
4.5.5	Validation of Numerical Model	74
4.5.6	Measurement of thickness along the axial length of the elliptical bulge tube	75
CHAPTER 5 EXPERIMENTAL AND NUMERICAL RESULTS		77
5.1	Tube wall thickness	78

5.1.1	Experimental Measurement of thickness at bulge zone	78
5.1.2	Simulation results on thickness distribution on bulge zone	79
5.1.3	Effect of thickness variation on internal pressure	82
5.2	Tube bulge height	86
5.2.1	Experimental Measurement of bulge Height at different internal Pressures	86
5.2.2	simulation result on tube bulge height	87
5.2.3	Comparison of experimental results with simulation results	89
5.2.4	Effects of internal pressures on bulge height	90
5.3	Corner Radius	91
5.3.1	Experimental measurement of corner radius at different internal pressures	91
5.3.2	simulation result on tube corner radius	92
5.3.3	Comparison of experimental results with simulation	95
5.3.4	Effect of corner radius with internal pressure	96
5.4	Failure Study on Al 6061 Tube Hydroforming Process	97
5.5	Mechanical Testing of deformed and Undeformed Samples	98
5.6	Forming Limit Curve	102
5.7	Surface Roughness	106
CHAPTER 6 CONCLUSION AND SCOPE OF FUTURE WORK		109
6.1	Conclusion	109
6.2	Scope for future research	112
