TABLE OF CONTENTS

ACKNOWLEDGEMENTS	V
TABLE OF CONTENTS	vii
LIST OF FIGURES	xiii
LIST OF TABLES	xv
LIST OF ABBREVIATIONS	xvii
LIST OF INDICES AND PARAMETERS	xxi
PREFACE	xxvii
1. INTRODUCTION	1
1.1. Prologue	1
1.2. Background and Motivation	8
1.3. Objective of research work	9
1.4. Novelty of research work	10
1.5. Organization of Thesis	10
2. LITERATURE REVIEW	15
2.1. Healthcare waste	15
2.2. HCWM in Various countries	15
2.3. Healthcare waste generation and Management Challenges	17
2.3.1. Integrated solid waste management	21
2.3.2. Existing approaches for SWM	22
3. TOOLS, TECHNIQUES AND METHODOLOGY	30

3.1. Total Interpretive Structural Modelling 30

3.1.1. Identification and Finalization of Items 31

3.1.2. Establish the contextual Relationship and develop SSIM 32

3.1.3. Develop Reachability Matrix 32

3.1.4. Partition of Reachability Matrix 33

3.1.5. Developing Canonical Matrix 34

3.1.6. Formation of Model 34

3.1.7. MICMAC Analysis 34

3.2. DEMATEL 35

3.2.1. Direct Relationship Matrix 36

3.2.2. Development of Normalized Relationship Matrix 36

3.2.3. Development of Total Relationship Matrix 36

3.2.4. Degree of Influence 37

3.2.5. Set up threshold and plot digraph 37

3.3. Quality Function Deployment 38

3.4. Analytical Hierarchy Process 42

3.4.1. Steps Involved in AHP 42

3.4.2. Basic Principle of AHP 47

3.4.3. Test of Consistency 45

3.5. Fuzzy Theory and Decision Making 46

3.5.1. Fuzzy Numbers 47

3.5.2. Triangular Fuzzy Number 47

3.5.3. Linguistic Variables 48

3.5.4. Ranking of Generalized Triangular Fuzzy Number 48

3.6. Two Echelon Location Routing Problem 49

4. Understanding the Interrelationship of HCWM Barriers 53

4.1. Identification and definition of barriers 53

4.2. Total Interpretative Structure Modeling 53

4.3. Interpretive matrix 64

4.4. Total interpretive structural model 66

4.5. MICMAC Analysis 67

4.6. DEMATEL 69

4.7. Results and Discussions 76

4.8. Concluding Remark 77

4.9. Theoretical and Managerial Implications 77

5. Finding Customer's Requirements and selecting important activities for their fulfillment 78

5.1. Introduction 78

5.2. Methodology 79

5.3. Discussion 84

5.4. Conclusion 84

5.5. Theoretical and Managerial Implications 84

6. Allocation of weight to HCWM barriers and policy recommendations to overcome barriers 86

6.1. AHP Method 86

6.2. Results of AHP 88

6.3. Strategies to overcome Barriers 95

6.4. Fuzzy TOPSIS Method 97

6.5. Results of Fuzzy TOPSIS 98

6.6. Conclusion 100

6.7. Theoretical and Managerial Implications 100

7. To Solve Hospital Waste Management Conundrum in an Unplanned City -A Case of Varanasi 101

7.1. Demographic of City 101

7.2. Healthcare Infrastructure 101

7.3. Hospital Waste Management 102

7.4. Research Objective 104

7.5. Problem Introduction 104

7.6. Healthcare Condition in Varanasi 105

7.7. Proposed IHWM system 106

7.8. Mathematical model formulation 107

7.9. Results and Discussion 111

7.10 Optimal waste Collection between Processing facility (PF) and Collection center (CC) 112

7.11. Optimal waste Collection between Collection centers and Hospitals 115

7.12. Conclusion 119

7.13. Managerial Implications 120

8. Conclusion and Future Scope 121

8.1. Introduction 121

8.2. Summary of Findings 121

8.3. Managerial Implications 123

8.4. Limitation of Present Work 124

8.5. Scope for Future Work 124
