CHAPTER	TITLE	PAGE
	Certificate	II
	Declaration by the Candidate	III
	Copyright Transfer Certificate	IV
	Acknowledgement	V
	Abstract	VI
	Contents	XXVI
	List of Tables	XXXI
	List of Figures	XXXV
	Notations, Symbols and Abbreviations	XLIII
1.	Introduction	1-8
	1.1 Objective and scope	5
	1.2 Methodology	6
	1.3 Organization of the thesis	7
2.	Literature Review	9-59
	2.1 General	9
	2.2 Mechanics of Rock Damage and Stress Redistribution	9
	2.3 Progressive Loading of Chain Pillars	19
	2.4 Strength of the Pillar	29
	2.5 Global Experience of the Chain Pillar Design	32
	2.6 Important Considerations in the Chain Pillar Design	40
	2.6.1 Safety Factor of Chain Pillar	40
	2.6.2 Stress-Strain Behaviour of Rocks	42
	2.6.3 Effect of Interface Friction, w/h and W/L Ratios	46
	2.6.4 Constitutive Behavior of the Caved Goaf	55
	2.7 Summary	56

3.	Research Methodology and Numerical Model Formulation	60-91
3.1	General	60
3.2	Model Formulation	61
3.3	Assessment of Roof Layers and their Mechanical Properties	63
3.4	Simulation of Parting Planes	64
3.5	Constitutive Model	67
	3.5.1. Selection of Material Model for Rock Mass	71
	3.5.2. Post-failure Degradation of Strength Parameters	72
3.6	Estimation of the Rock Mass Properties	73
3.7	In-situ Stress Field	76
3.8	Two-dimensional Model for Chain Pillar Stability (Model I)	77
3.9	Estimation of Rock Mass Parameters for Fractured and Continuous Deformation zones (Model VI)	79
3.10	Derivation of the Strain Softening Parameters (Model III)	80
3.11	Study of Failed and Stable Pillars (Model IV)	83
3.12	Study of Goaf Behaviour Control Parameters (Model II)	85
3.13	Assessment of Abutment Angle in Longwall Workings (Model V)	86
3.14	Design Criterion For Chain Pillars	89
3.15	Summary	90
4.	Numerical Simulation of the Strain-Softening Behaviour	92-116
4.1	General	92
4.2	Constitutive Behaviour	92
4.3	Post-peak Strength Parameters	95
4.4	Drop Rates and Residual Cohesion and Friction angle	97
4.5	Statistical Models for Post-Peak Strength Parameters	108
4.6	Model Validation	110
4.7	Summary	115

5.	Criterion for Factor of Safety of Chain Pillar	117-131
5.1	General	117
5.2	Failed and Stable Pillar Cases	117
5.3	Estimation of Rock Mass Properties of Coal	119
5.4	Numerical Modeling of the Pillar	121
5.5	Modeling Results	122
5.6	Design Criterion	130
5.7	Summary	130
6.	Strength and Deformability Parameters of the Damaged Zones	132-159
6.1	General	132
6.2	Delimitation of the Zones in the Area of the Excavation	133
6.3	Selection of Material Models	135
6.4	Model Parameters for the Caved Goaf Material	136
6.5	Fractured zone Model Parameters	141
6.6	Model Parameters for the Continuous Deformation zone	146
6.7	Verification of Modelling Results	153
6.8	Summary	157
7.	Determining Abutment Angle for Varying Geo-Mining Conditions	160-173
7.1	General	160
7.2	Mechanism of Formation of the Abutment Angle	160
7.3	Identification of Parameters affecting Abutment Angle	162
7.4	Numerical Modelling Study	163
7.5	Model Observations	165
7.6	Statistical Model for Estimation of the Abutment angle	169
7.7	Model Verification	171
7.8	Summary	172

8.	Study of the Chain Pillars Stability in Longwall Workings	174-188
8.1	General	174
8.2	Development of Predictive Model for Factor of Safety	178
	8.2.1. Model for Single Row Configuration of Chain Pillars	182
	8.2.2. Model for Double Row Configuration of Chain Pillars	183
8.3	Performance Evaluation of the Model	184
8.4	Influence of Critical Parameters on the Stability of Chain Pillars	185
8.5	Summary	188
9.	Case Studies for the Optimum Design of Chain Pillars in Deep Longwall Workings	189-253
9.1	General	189
9.2	Site and Geo-mining Details	190
	9.2.1 Adriyala Longwall Project	190
	9.2.2 Moonidih Colliery	193
	9.2.2.1 The XVIII Seam working	194
	9.2.2.2 The XVI Top Seam Working	196
	9.2.2.3 The XV Seam Working	198
9.3	Determination of the Optimum Pillar Size	199
9.4	Elasto-Plastic Modelling Results	204
	9.4.1. Chain pillar between Panels P1-P2 in Adriyala Seam-I Working	205
	9.4.2. P2-P3 Chain pillar in Adriyala Seam-I Working	213
	9.4.3. Chain Pillar between panels P3-P4 in Adriyala Seam-I Working	216
	9.4.4. Chain Pillars Between Panels A4-A5 in Moonidih XVIII Seam Working	218
	9.4.5. Chain Pillars between Panels D12-D13	224
	9.4.6. Single Row Pillar between Panels T3- T4 in XV Top Seam Working at Moonidih Colliery	229
	9.4.7. Double Row Pillar between Panels T3- T4 in XV Top Seam Working at Moonidih Colliery	236

9.5	Summary	244
10.	Discussion and Conclusion	254-273
10.1	Discussion	254
10.2	Conclusion	270
10.3	Future Scope of Work	273
