List of Tables.....	xxv
List of Abbreviations and Symbols.....	xxvi
Preface.....	xxviii

Chapter 1: Introduction and Literature Review

1.1	Introduction	1
1.2	Amalgamation of nanotechnology with natural products	1
1.3	Synthesis and properties of carbon nanodots (CNDs)	5
1.4	Toxicity issues of CNDs	13
1.5	Applications of CNDs	14
1.6	Conclusions	26

Chapter 2: Rationale and Objectives

2.1	Rationale	27
2.2	Objectives	28

Chapter 3: Materials and Methods

3.1	Introduction	29
3.2	Materials	29
3.3	Equipment and software	32

3.4	Methods	34
3.4.1	Collection and authentication of plant specimen by DNA fingerprinting	34
3.4.2	Fabrication of CNDs	35
3.4.3	Instrumentations and characterization of CNDs	36
3.4.3.1.	High resolution-transmission electron microscopy (HR-TEM)	37
3.4.3.2	X-ray photoelectron spectroscopy (XPS)	38
3.4.3.3.	X-ray diffraction (XRD)	38
3.4.3.4.	Raman spectroscopy	39
3.4.3.5.	Fourier transform- infrared spectroscopy (FT-IR)	39
3.4.3.6	UV-visible spectroscopy	40
3.4.3.7.	Fluorescence spectroscopy	40
3.4.4	Determination of the quantum yield of CNDs	41
3.4.5	Stability studies	42
3.4.5.1	Colloidal dispersion stability	42
3.4.5.2	Thermal stability	42
3.4.5.3	Photostability	42
3.5	Applications of CNDs	42
3.5.1	Sensing of biologically and environmentally relevant metal ions	42
3.5.2	Cytotoxic potential of CNDs	43
3.5.3.	Free radical scavenging potential	44
3.5.4.	Viability studies using multidrug-resistant bacterial cells	45
3.6.	Animal studies	46
3.6.1	Animal ethics	46
3.6.2	Animal husbandry	46
3.6.3	<i>In-vivo</i> toxicity evaluation	46

3.6.4.	Evaluation of hematological and biochemical parameters in mice	48
3.6.5.	Histological analysis of organs in treated mice	48
3.7	Statistical analysis of data	49

Chapter 4: Fluorescent CNDs from Aqueous Extract of *Andrographis paniculata* and their applications

4.1	Introduction	50
4.2	Experimental section	51
4.2.1	Materials	51
4.2.2	Fabrication of CNDs from <i>Andrographis paniculata</i> (AP)	51
4.2.3	Characterization of AAPCDs	52
4.2.4	Applications of AAPCDs	52
4.2.4.1	Sensing of environmentally and biologically relevant metal ions	52
4.2.4.2	Cytotoxicity studies and cellular imaging of AAPCDs	52
4.2.4.3	Viability studies using multidrug-resistant bacterial culture	53
4.2.4.4	Free radicals sensing and scavenging potential	53
4.2.4.5	CNDs as fluorescent ink	53
4.2.4.6	<i>In-vivo</i> toxicity evaluation	54
4.2.5	Statistical analysis	54
4.3	Results and Discussion	54
4.3.1	Formation of AAPCDs	54
4.3.2	Characterization of AAPCDs	56
4.3.3	Optical properties of AAPCDs	58
4.3.4	Stability studies of CNDs	59

4.3.5	Applications of AAPCDs	61
4.3.5.1	Metal sensing	61
4.3.5.2	Cytotoxicity and bioimaging studies	63
4.3.5.3	AAPCDs as free radical sensors and scavengers	65
4.3.5.4	Viability studies with MDR bacterial strains	67
4.3.5.5	AAPCDs as fluorescent ink	67
4.3.5.6	<i>In-vivo</i> toxicity evaluation in Swiss albino mice	69
4.4	Conclusions	73

Chapter 5: Fluorescent CNDs from Ethanolic Extract of *Andrographis paniculata* and their applications

5.1	Introduction	74
5.2	Experimental section	76
5.2.1	Authentication of plant and extraction	76
5.2.2	Fabrication of EAPCDs	77
5.2.3	Characterization, optical properties, and stability studies	78
5.2.4	Applications of EAPCDs	78
5.2.4.1	Sensing of environmentally and biologically relevant metal ions	78
5.2.4.2	Cytotoxicity studies and cellular imaging of EAPCDs	78
5.2.4.3	Viability studies using multi drug-resistant bacterial culture	79
5.2.4.4	Free radicals sensing and scavenging potential	79
5.2.4.5	<i>In-vivo</i> toxicity evaluation	79
5.2.5	Statistical analysis	80
5.3	Results and Discussion	80

5.3.1	Formation of EAPCDs	80
5.3.2	Characterization of EAPCDs	81
5.3.3	Optical properties of EAPCDs	83
5.3.4	Stability studies of EAPCDs	84
5.3.5	Applications of EAPCDs	85
5.3.5.1	Metal sensing	85
5.3.5.2	Cytotoxicity and bioimaging studies	87
5.3.4.3.	Scavenging and sensing of free radicals	88
5.3.5.4	Viability studies using MDR bacterial strains	89
5.3.5.5	<i>In-vivo</i> toxicity evaluation in swiss albino mice	90
5.4	Conclusion	95

Chapter 6: Fluorescent CNDs from *Asparagus racemosus* and Their Various Applications

6.1	Introduction	96
6.2	Experimental section	97
6.2.1	Materials	97
6.2.2	Fabrication of CNDs from <i>Asparagus racemosus</i> (AR)	97
6.2.3	Characterization, optical properties and stability studies	99
6.2.4	Applications of ARCD and ARCCD	99
6.2.4.1	Sensing of environmentally and biologically relevant metal ions	99
6.2.4.2	Cytotoxicity studies	99
6.2.4.3	Viability studies using MDR bacterial strains	101
6.2.4.4	Free radical scavenging potential	101

6.2.4.5	<i>In-vivo</i> toxicity evaluation	101
6.2.5	Statistical analysis	102
6.3	Results and discussion	102
6.3.1	Formation of ARCD and ARCCD	102
6.3.2.	Characterization of ARCD and ARCCD	104
6.3.3	Optical properties of ARCD and ARCCD	108
6.3.4	Stability studies of ARCD and ARCCD	110
6.3.5	Applications of ARCD and ARCCD	112
6.3.5.1	Metal sensing	112
6.3.5.2	Cytotoxicity assays against MDA-MB-231 and SiHa cells	115
6.3.5.3	Viability studies using MDR bacterial strains	120
6.3.5.4	Radical scavenging potential using DPPH assay	122
6.3.5.5	<i>In-vivo</i> toxicity evaluation in swiss albino mice	123
6.4	Conclusion	128

Chapter 7: Fluorescent CNDs from Quercetin and Their Various Applications

7.1	Introduction	129
7.2	Experimental section	131
7.2.1	Materials and chemicals	131
7.2.2	Fabrication of quercetin-based CNDs	131
7.2.3	Andrographolide isolation and characterization from AP leaves	132
7.2.4	Loading of andrographolide (Ad) and the release behavior of qCD-Pg-Ad	133

7.2.5	Characterization, optical properties and stability studies	134
7.3	Applications of CNDs	135
7.3.1	Metal sensing	135
7.3.2	Cytotoxicity against K-562 leukemia cell lines	136
7.3.3	Viability studies using MDR bacterial strains	137
7.3.4	Free radical scavenging activities of CNDs	137
7.3.5	Statistical analysis	137
7.4	Results and Discussion	138
7.4.2	Formation of CNDs	138
7.4.3	Characterization of CNDs	138
7.4.4	Drug release studies	140
7.4.5	Optical properties of CNDs	142
7.4.6	Stability studies of CNDs	144
7.4.7	Applications of CNDs	146
7.4.7.1	Metal sensing	146
7.4.7.2	Cytotoxicity against K-562 leukemia cell lines	149
7.4.7.3	Viability studies using MDR bacterial strains	150
7.4.7.4	Free radical scavenging activity	151
7.5	Conclusion	154

Chapter 8: Summary and Conclusions

Summary and Conclusions.....155
