

LIST OF SCHEMES

Scheme		Page No.
1.1	Reduction and Oxidation of nitric oxide	1
1.2	Ehrlich-Sachs reaction	2
1.3	Synthesis of <i>C</i> -Nitrosamines <i>via</i> oxidation	4
1.4	Synthesis of <i>para</i> -nitroso aniline	4
1.5	Synthesis of <i>C</i> -nitrosamines <i>via</i> photochemical route	5
1.6	Synthesis of nitrosothiols	6
1.7	Decomposition of <i>S</i> -nitrosothiols	7
1.8	Transnitrosation <i>via</i> thiols	8
1.9	Synthesis of alkyl nitrites	8
1.10	Generation of nitrosonium ion	11
1.11	Reactions of different amines with nitrosonium ion	11
1.12	Electrophilic substitution at α -carbon of <i>N</i> -nitrosamine	13
1.13	Alkylation of <i>N</i> -nitrosamine through α -lithiation	14
1.14	Oxidative coupling <i>via</i> lithionitrosamine	14
1.15	Classical method for assessment of sydnones	15
1.16	Applications of sydnones in synthesis of heterocycles	15
1.17	Fischer-Hepp rearrangement	16
1.18	Mechanism for Fischer-Hepp rearrangement	16
1.19	Synthesis of <i>C</i> -nitroso of quinoline derivative I	17
1.20	<i>C</i> -nitrosation of pyrimidines	17
1.21	Reduction of <i>N</i> -nitrosamines	18
1.22	Oxidation of <i>N</i> -nitrosamines with hydrogen peroxide and nitric acid	19
1.23	Oxidation of <i>N</i> -nitrosamines with trifluoroacetic acid	19
1.24	Synthesis of <i>N</i> -nitro amine using HNO ₃ /H ₂ SO ₄	19
1.25	Chemical denitrosation of <i>N</i> -nitrosamine	20
1.26	Photolysis of N-NO of nitrosamines leads to photoaddition, photoreduction and photoelimination	22
1.27	Rhodium catalyzed <i>N</i> -nitroso directed C-H activation	24
1.28	<i>o</i> -Alkoxylation of <i>N</i> -Nitrosamines	25
1.29	Palladium catalyzed nitroso-directed <i>ortho</i> -acylation	26
1.30	Palladium catalyzed <i>o</i> -acyloxylation of <i>N</i> -nitrosoanilines	26
2.1	Some traditional applications of <i>N</i> -nitrosamines	34
2.2	Traditional method of <i>N</i> -nitrosation of secondary amine	36
2.3	Conversion of <i>N</i> -benzylaniline to corresponding <i>N</i> -nitrosoaniline using NaNO ₂ /HCl and TBN	42

2.4	Nitrosation reaction with <i>N</i> -(4-Hydroxybenzyl) 4-bromoaniline (1m)	44
2.5	A synthetic route for the preparation of compound G	46
2.6	Plausible mechanism of <i>N</i> -nitrosation.	49
2.7	Control experiment with TEMPO	49
3.1	Applications of <i>N</i> -nitrosamines in various transformations	85
3.2	Formation of <i>N</i> -nitrosamine as the by-product	85
3.3	Denitrosation of <i>N</i> -nitrosamines	86
3.4	Synthesis of Pendimethalin using Iodine and triethylsilane in DCM	91
3.5	Palladium catalyzed C-H activation followed by denitrosation	93
3.6	Rhodium catalyzed C-H activation followed by denitrosation	94
3.7	Nitrosative dealkylation of <i>tert</i> -amines	95
3.8	<i>N</i> -Nitroso moiety as protecting group in organic synthesis	96
3.9	Proposed mechanism for the denitrosation reaction	96
4.1	Different approaches for the synthesis of <i>N</i> -alkyl nitroanilines	130
4.2	Effect of TBN leads to different products	131
4.3	Denitrosation of <i>N</i> -nitrosamine 2aa	133
4.4	Nitration of <i>o</i> -substituted <i>N</i> -alkyl anilines	137
4.5	Fisher-Hepp rearrangement reaction mechanism	139
4.6	Synthesis of benzimidazole and benzotriazoles	145
4.7	Plausible mechanism for ring nitration reaction	146
4.8	Nitration of <i>N</i> -acyl <i>N</i> -alkyl anilines with TBN	147
5.1	Preparation of thiourea dioxide.	221
5.2	Reduction of <i>N</i> -nitroso <i>N</i> -benzyl aniline with different sulphur containing reducing agents	224
5.3	Reduction of <i>N</i> -nitroso- <i>N</i> -alkyl anilines	228
5.4	Reduction of <i>N</i> -nitroso- <i>N</i> -allyl and propargyl anilines	229
5.5	One-pot synthesis of α -substituted aryl hydrazines	230
5.6	Reduction of dibenzyl and dihexyl <i>N</i> -nitrosamine	230
5.7	Proposed mechanism for the reduction of <i>N</i> -nitrosamines with thiourea dioxide	231
6.2	Synthesis of <i>N</i> -nitrosamines using <i>tert</i> -butyl nitrite	251
6.3	Denitrosation of <i>N</i> -nitrosamines	252
6.4	Synthesis of nitro compounds	252
6.5	Synthesis of arylhydrazines	253
6.6	Synthesis and applications of <i>N</i> -nitrosamines	254
