List of Figures.....	xix
List of Tables	xxv
List of Abbreviations and Symbols	xxvii
Preface.....	xxxii
Chapter- 1	1
1 Introduction and Literature Review.....	1
1.1 Carbon Nanomaterials.....	1
1.1.1 Fullerene	2
1.1.2 Graphene.....	3
1.1.3 Carbon Nanotube	4
1.1.4 CNT Functionalization.....	8
1.2 Carbon quantum dots	9
1.2.1 Synthesis Methods of CQDs.....	10
1.2.2 Hydrothermal Process.....	12
1.2.3 Properties of CQDs.....	15
1.2.4 Application of CQDs	19

Chapter-2	31
2 Methodology and Instrumentation	31
2.1 Materials Used for the Synthesis and Other Experiments of CQDs	31
2.2 Preparation of CQDs	32
2.2.1 Banana-derived CQDs for OLED Application	32
2.2.2 Banana-derived CQDs for Heavy Metal Detection	32
2.2.3 Banana-derived Chl-CQDs for Cervical Cancer Application.....	33
2.2.4 Pride of India plant-derived CQDs for Environment Application.....	34
2.3 Apparatus Used in the Experiments	35
2.4 Experiments Related to SWNTs doped Optoelectronic Devices	37
2.4.1 Device Fabrication	37
2.5 Experiments Related to CQDs as Electron Transport Layer in OLED	38
2.5.1 Device fabrication of OLED	38
2.6 Experiments Related to CQDs as dual probe sensor for Mercury and Arsenic	40
2.6.1 Computational Details	40
2.7 Experiments Related to CQDs as drug for Cervical Cancer	42
2.7.1 Cell lines and cell culture.....	42
2.7.2 Assay for cell proliferation	42
2.7.3 Assay for cell morphology.....	42
2.7.4 Assay for nuclear fragmentation.....	43
2.7.5 Assay for apoptosis	43
2.7.6 Assay for plasma membrane integrity	43
2.8 Experiments Related to CQDs as Ammonia and Lead detection.....	44
2.8.1 Fabrication of gas sensor	44
2.8.2 Detection of Vapour Phase	44
Chapter-3	47
3 Octadecylamine Functionalized SWNT doped Polymer Based Optoelectronic Devices	47
3.1 Introduction	47
3.1.1 Fundamentals of OLED	47

3.1.2	Fundamentals of OLET.....	48
3.1.3	Charge transport materials for optoelectronic devices.....	48
3.1.4	Properties of SWNT.....	49
3.2	Result and Discussion	50
3.2.1	Optical property of PSBF polymer and effect of doping with SWNT	50
3.2.2	Device structure of OLED	51
3.2.3	Doping Effect in OLED	52
3.2.4	Electrical Characterization of OLED.....	53
3.2.5	Device structure of VOLET.....	55
3.2.6	Electrical Characterization of VOLET	57
3.3	Conclusion.....	59
 Chapter 4		61
4 Carbon Quantum Dot as Electron Transporting Layer in Organic Light Emitting Diode.....		61
4.1	Introduction	61
4.1.1	Fundamentals of OLED	61
4.1.2	Hole and electron transport materials in OLED	62
4.1.3	Properties of CQDs.....	62
4.2	Results and Discussion.....	64
4.2.1	Optical, structural and morphological characterization of CQDs.....	64
4.2.2	Device structure of OLED	66
4.2.3	Electrical characterization of OLED.....	66
4.3	Conclusions	68

Chapter-5..... 69

5 Deciphering Interaction between Chlorophyll functionalized Carbon Quantum Dots with Arsenic and Mercury Toxic Metals in Water as Highly Sensitive Dual-probe Sensor..... 69

5.1	Introduction	69
5.1.1	Source of Water Pollution.....	69
5.1.2	Techniques for detection of heavy metals in water	70
5.1.3	Properties of CQDs	71
5.2	Results and Discussion.....	73
5.2.1	Optical characterization of CQDs.....	73
5.2.2	Chemical composition of CQDs	76
5.2.3	Structural and Optical Properties of CQDs.....	84
5.2.4	Sensing of Hg ⁺ and As ³⁺ ions	86
5.2.5	Test on real water sample	93
5.2.6	Sensing mechanism with Arsenic and mercury ions	94
5.2.7	DFT Calculations for Understanding the Interaction between the CQDs Surface and metal ions.....	102
5.2.8	Theoretical Absorption Spectra	106
5.3	Conclusion.....	108

Chapter-6..... 111

6 Therapeutic Potential of Chlorophyll Functionalized Carbon Quantum Dots against Cervical Cancer 111

6.1	Introduction	111
6.1.1	Threat about Cervical Cancer	111
6.1.2	Properties and Biological Applications of Chl-CQDs.....	112
6.2	Results	113
6.2.1	Characterization of Chl-CQDs.....	113
6.2.2	Free Radical scavenging Activity.....	120
6.2.3	Chl-CQDs suppresses the cell viability of cancer cell.....	121
6.2.4	Chl-CQDs promotes morphological changes in SiHa cells.....	123

6.2.5	Chl-CQDs promotes nuclear changes in SiHa cells	124
6.2.6	Chl-CQDs promotes apoptosis in SiHa cells	124
6.2.7	Chl-CQDs promotes plasma membrane damage in SiHa cells	125
6.3	Discussion	126
6.4	Conclusion.....	128
Chapter-7.....		131
7	Synthesis and Characterization of Multifunctional Carbon Quantum Dots to fabricate Facile Sensing System for Ammonia Vapour and Lead	131
7.1	Introduction	131
7.1.1	Toxic Pollutants and their Harmful effect	131
7.1.2	Harmful Effects of Ammonia	132
7.1.3	Harmful Effects of Lead	132
7.1.4	Advantages of Electrical Sensors.....	133
7.1.5	Introduction to CQDs as Detection Tools against Environmental Protection .	134
7.2	Result and discussion	134
7.2.1	Characterization of CQDs.....	134
7.2.2	Gas Sensing Mechanism	138
7.2.3	Sensing with Ammonia.....	140
7.2.4	Lead Detection in Water	142
7.3	Conclusion.....	143
Chapter-8.....		145
8	Conclusion and future scope.....	145
