
CONTENTS

Abbreviations	X-XI
List of symbols	XII
List of figures	XIII-XIV
List of tables	XV-XVII
Preface	XVIII-XX
CHAPTER-1 Introduction to computational details	1-30
1.1 Introduction	1
1.2 Conformational analysis	1
1.3 Non-covalent interaction	3
1.3.1 Types of NCI	3
1.3.2 Hydrogen bonding	4
1.3.3 Sulfur centered hydrogen bonds	7
1.4 Computational and theoretical methods	8
1.4.1 Born-Oppenheimer approximation	8
1.4.2 Density functional theory	9
1.4.2.1 Hohenberg-Kohn theorem	9
1.4.2.2 Kohn-Sham equation	10
1.4.3 Møller-Plesset Perturbation theory	13
1.4.4 Coupled cluster method	16
1.4.5 Basis Set	18
1.4.6 Interaction energy calculation	20
1.4.7 Complete basis set limit extrapolation	21
1.5 Computational tools and server credentials	21

1.6 Molecular Properties	23
1.6.1 Quantum theory of atoms in molecules	23
1.6.2 Natural bond orbital	24
1.6.3 Frontier molecular orbital	25
1.6.4 Electrostatic potential surface	27
1.6.5 Mullikan charge	27
1.6.6 Non-covalent interaction	28
1.6.7 Objective of thesis	29
CHAPTER-2 Conformational and structural stability of ethanethiol	31-52
2.1 Introduction	31
2.2 Computational methods	33
2.3 Results and discussion	34
2.3.1 Natural bond orbital	43
2.3.2 Mullikan charge	46
2.3.3 Population analysis	47
2.3.4 Frontier molecular orbital	48
2.3.5 Normal modes analysis	50
2.4 Conclusion	52
CHAPTER-3 Conformational and structural stability of propylthiol	53-86
3.1 Introduction	53
3.2 Computational methods	55
3.3 Results and discussion	56
3.3.1 Electrostatics potential surface plot	72
3.3.2 Mullikan charge analysis	75
3.3.3 Natural bond orbital	76
3.3.4 Frontier molecular orbital	81
3.3.5 Non-covalent interaction plot	84
3.4 Conclusion	85
CHAPTER-4 Conformational and structural stability of methanethiol clusters	87-120
4.1 Introduction	87
4.2 Computational methods	89

4.3 Results and discussion	90
4.3.1 Methanethiol dimer	90
4.3.2 Methanethiol trimer	97
4.3.3 Local energy decomposition analysis	102
4.3.4 Normal mode analysis	103
4.3.5 Atoms in molecule analysis	107
4.3.6 Frontier molecular orbital	110
4.3.7 Mullikan charge analysis	113
4.3.8 Natural bond orbital	115
4.4 Conclusion	119
CHAPTER-5 Sulfur centered hydrogen bonds in methanethiol-water cluster	121-145
5.1 Introduction	121
5.2 Computational methods	123
5.3 Results and discussion	124
5.3.1 Geometry	124
5.3.2 Local energy decomposition analysis	133
5.3.3 Atoms in molecules analysis	135
5.3.4 Frontier molecular orbital	139
5.3.5 Natural bond orbital	142
5.4 Conclusion	145
CHAPTER-6 Summary and future scope	146-149
6.1 Summary	146
6.2 Future scope	149
REFERENCES	150-167
LIST OF PUBLICATIONS	168
