TITLE OF THESIS	i
CERTIFICATE	ii
DECLARATION BY THE CANDIDATE & CERTIFICATE BY THE SUPERVISOR	iii
COPYRIGHT TRANSFER CERTIFICATE	iv
Dedication	v
Acknowledgement	vi-vii
Contents	viii-xiv
List of Figures	xv-xix
List of Schemes	xx
List of Tables	xxi
List of Symbols/Abbreviations	xxii-xxiv
Preface	xxv-xxviii
Chapter 1: Introduction and literature review	1-36
1.1 Introduction	1
1.2 Carbon quantum dots (CQDs)	5
1.2.1 Synthesis of CQDs	6
1.2.1.1 Top-down approach	7
A. Laser Ablation	8
B. Arc-discharge method	8
C. Electrochemical method	9
1.2.1.2 Bottom-up Approach	9
A. Thermal oxidation/Combustion method	10
B. Microwave Irradiation method	10

C.	Ultrasonic-assisted method	11
D.	Hydrothermal and solvothermal method	12
1.2.2	Optical properties of CQDs	13
1.2.2.1	Absorption	13
1.2.2.2	Fluorescence	13
1.2.2.3	Phosphorescence	17
1.2.3	The influence of doping on the fluorescence properties of CQDs	17
1.2.3.1	Single-heteroatoms doping	18
A.	N-Doped CQDs	18
B.	S-Doped CQDs	19
C.	B-Doped CQDs	20
D.	P-Doped CQDs	20
1.2.3.2	Co-doping of multi heteroatoms	21
A.	N and S co-doped CQDs	22
B.	N and P co-doped CQDs	22
C.	N and B co-doped CQDs	23
D.	B and S co-doped CQDs	24
1.3	Fluorescence quantum yield	24
1.4	An overview of Fluorescence quenching	24
1.5	Applications of CQDs	26
1.5.1	Biosensing	26
1.5.2	Chemical sensing	27
1.5.3	Photocatalysis	28
1.5.4	Bio-imaging	29

1.5.5	Drug delivery	30
1.5.6	Optoelectronics	32
1.5.7	Peroxidase-like mimetic activity	33
1.6	Motivation of the study	34
1.7	Objectives of the study	35
Chapter 2: Materials and Methods		37-53
2.1	Introduction	37
2.2	Materials	37
2.3	Methods	39
2.3.1	Synthesis of carbon quantum dots (CQDs)	39
2.4	Preparation of standard	40
2.4.1	Preparation of standard solution of ascorbic acid (AA)	40
2.4.2	Preparation of standard solution of 3,3',5,5'- Tetramethylbenzidine (TMB)	40
2.4.3	Preparation of standard solution of Picric Acid (PA)	40
2.4.4	Preparation of standard solution of chlorpyrifos	41
2.5	Biocompatibility and Cell Viability studies	41
2.6	Calculations	41
2.6.1	Quantum yield (QY) determination	41
2.6.2	Determination of limit of detection (LOD)	42
2.6.3	Determination of Stern-Volmer constant	42
2.7	Characterization of CQDs	42
2.7.1	Transmission Electron Microscopy (TEM)	42

2.7.2	Fourier Transform Infrared Spectroscopy (FTIR)	44
2.7.3	UV-visible Spectroscopy	45
2.7.4	Fluorescence Spectroscopy	48
2.7.5	X-ray Diffraction (XRD)	49
2.7.6	Zeta Potential	51
2.7.7	X-ray Photoelectron Spectroscopy (XPS)	52
Chapter 3:		54-81
Mustard seeds derived fluorescent carbon quantum dots and their peroxidase-like activity for colorimetric detection of H₂O₂ and ascorbic acid in a real sample		
3.1	Introduction	54
3.2	Materials and method	56
3.2.1	Hydrothermal Synthesis M-CQDs	56
3.2.2	Quantum yield determination	56
3.2.3	Investigation of Peroxidase- like mimetic activity	57
3.2.4	Analysis of hydroxyl radical	57
3.2.5	Detection of H ₂ O ₂ by colorimetric method	58
3.2.6	Detection of Ascorbic Acid (AA)	58
3.2.7	Colorimetric detection of AA in real fruit juices	58
3.2.8	Experimental methodology	58
3.3	Results and discussion	59
3.3.1	Characterization	59
3.3.2	Photophysical properties	62
3.3.3	Peroxidase-like mimetic activity of M-CQDs	65

3.3.3.1	Steady-state kinetic assay of M-CQDs	67
3.3.3.2	Possible Mechanism of peroxidase-like mimetic activity	71
3.3.3.3	Colorimetric detection of H ₂ O ₂	73
3.3.3.4	Colorimetric detection of ascorbic Acid	74
3.3.3.5	Colorimetric detection of AA in real fruits Juices	78
3.4	Conclusion	80
Chapter 4:		82-103
Nitrogen/sulfur-co-doped carbon quantum dots: a biocompatible material for the selective detection of picric acid in aqueous solution and living cells		
4.1	Introduction	82
4.2	Materials and method	84
4.2.1	Synthesis of NS-CQDs	84
4.2.2	Assay for the detection of PA	85
4.2.3	Cell Culture	85
4.2.4	Cytotoxicity study of NS-CQDs	85
4.2.5	Quantification of cellular fluorescence	86
4.2.6	Quantum yield determination	86
4.2.7	Experimental methodology	87
4.3	Results and discussion	87
4.3.1	Characterization	87
4.3.2	Optical Properties	92
4.3.3	Selectivity towards the detection of PA	95
4.3.4	Sensitivity assay	96

4.3.5	Possible mechanism of PA sensing	98
4.3.6	Biocompatibility & Cell Viability	100
4.3.7	Picric acid sensing in living cells	101
4.4	Detection of PA in a real environmental sample	102
4.5	Conclusion	103
Chapter 5:		104-128
Synthesis of fluorescent carbon quantum dots from Jatropha fruits and their application in fluorometric sensor for the detection of chlorpyrifos		
5.1	Introduction	104
5.2	Materials and method	107
5.2.1	Synthesis of J-CQDs	107
5.2.2	Assay for AChE activity	108
5.2.3	Detection of chlorpyrifos	108
5.2.4	Experimental methodology	109
5.2.5	Quantum yield determination	109
5.3	Results and discussion	109
5.3.1	Characterizations	109
5.3.2	Optical Properties	112
5.3.3	Detection assay of chlorpyrifos	116
5.3.4	Detection of chlorpyrifos	119
5.3.5	Selectivity of chlorpyrifos	122
5.3.6	Possible Mechanism	123
5.4	Real Sample Analysis	127
5.5	Conclusion	127

Summary	128-131
Future Recommendations	132-133
References	134-171
List of publications	172-174
