| <b>Chapter 1: Introduction</b>                             |                 |
| 1.1 Introduction.....                                      | 1               |
| 1.2 Composites and laminated structures.....               | 2               |
| 1.3 Classification of composites.....                      | 6               |
| 1.4 Mechanics of composites.....                           | 8               |
| 1.5 Material system of typical aerospace structure.....    | 10              |
| 1.6 Graphite-epoxy laminated composite.....                | 11              |
| 1.6.1 Graphite.....  | 11              |
| 1.6.2 Types of graphite.....                               | 12              |
| 1.6.3 Key properties of graphite.....                      | 13              |
| 1.6.4 Applications.....                                    | 14              |
| 1.6.5 Epoxy.....   | 15              |
| 1.7 Adhesively bonded joints.....                          | 15              |
| 1.8 Adhesive and adhesion.....                             | 16              |
| 1.9 Damage mechanism of laminated composites.....          | 20              |
| 1.10 Delamination.....                                     | 21              |
| 1.10.1 Origin of delamination.....                         | 22              |
| 1.10.2 Skin-stiffener debonding.....                       | 23              |
| 1.10.3 Difference between debonding and delamination.....  | 24              |
| 1.11 Analysis of interlaminar fracture.....                | 26              |
| 1.12 Loading effects on laminated composite materials..... | 26              |
| 1.13 Motivation.....                                       | 27              |
| 1.14 Thesis overview.....                                  | 29              |

## **Chapter 2: Literature Review**

|  |    |
|--|----|
| 2.1 Introduction.....  | 33 |
| 2.2 Bimodular material property.....   | 33 |
| 2.3 Application of composites in aerospace structure.....  | 35 |
| 2.4 Interlaminar delamination in composite Structures under mechanical loading.....                        | 35 |
| 2.5 Thermo-elastic damage evaluation using plate theory.....   | 38 |
| 2.6 Delamination phenomena based on VCCT under mechanical loading.....                                     | 38 |
| 2.7 Damage mechanism in adhesively bonded joints with unimodular material properties.....                  | 40 |
| 2.8 Thermal characteristics of adhesive joints.....  | 41 |
| 2.9 Concept of mixed adhesive technique.....   | 43 |
| 2.10 Functionally graded adhesive joints.....  | 45 |
| 2.11 Failure of composite skin-stiffener with unimodular material properties under mechanical loading..... | 46 |
| 2.12 Study of embedded delamination.....   | 47 |
| 2.13 Analysis of delamination growth phenomena using VCCT in skin-stiffener.....                           | 48 |
| 2.14 Concept of Weibull Distribution.....  | 49 |
| 2.15 Research gap.....   | 49 |
| 2.16 Objectives.....   | 50 |
| 2.17 Summary.....  | 51 |

## **Chapter 3: Theoretical Background**

|  |    |
|--|----|
| 3.1 Introduction.....  | 53 |
| 3.2 Basic Theory of bimodularity in composites.....                                  | 53 |
| 3.2.1 Assumptions.....   | 53 |
| 3.2.2 Formulation for equation of deformed shape.....                                | 54 |
| 3.2.3 Location of neutral axis.....  | 56 |
| 3.3 Functionally graded bimodular thermo-elasticity and its governing equations..... | 58 |
| 3.4 Finite element formulation for generalized thermoelasticity.....                 | 65 |
| 3.5 Computation of energy release rate.....  | 68 |
| 3.5.1 Virtual Crack Closure Technique (VCCT).....                                    | 68 |
| 3.5.2 Modified Crack Closure Integral (MCCI).....                                    | 70 |

|   |     |
|---|-----|
| 3.6 Analysis of shifting of neutral axis due to bimodularity.....   | 73  |
| 3.7 Conclusion.....   | 79  |
| <b>Chapter 4: Stress Analysis of Adhesively Bonded Joints</b>   |     |
| 4.1 Introduction.....   | 81  |
| 4.2 Finite element modeling.....  | 82  |
| 4.3 Finite element meshing of the analysis domain.....  | 84  |
| 4.4 Results and discussion.....   | 86  |
| 4.5 Conclusion.....   | 94  |
| <b>Chapter 5: Failure Analysis of FRP Composite Tee-joint</b>   |     |
| 5.1 Introduction.....   | 95  |
| 5.2 Numerical analysis.....   | 97  |
| 5.3 Results and discussion.....   | 102 |
| 5.3.1 Tee-joint delamination with mechanical load.....  | 102 |
| 5.3.2 Tee-joint delamination with coupling effect of curing stresses and axial loading.....   | 109 |
| 5.3.3 Comparison of tee-joint delamination with and without considering the coupling effect of curing stresses and axial loading..... | 114 |
| 5.4 Conclusion.....   | 117 |
| <b>Chapter 6: Delamination Analysis of Composite Laminate</b>   |     |
| 6.1 Introduction.....   | 121 |
| 6.2 Finite element modeling.....  | 122 |
| 6.3 Results and discussion.....   | 129 |
| 6.3.1 Three-point bending load.....   | 129 |
| 6.3.2 Tensile Load.....   | 134 |
| 6.4 Conclusion.....   | 139 |
| <b>Chapter 7: Delamination Analysis of Skin-stiffener</b>   |     |
| 7.1 Introduction.....   | 141 |
| 7.2 Numerical Analysis.....   | 142 |
| 7.2.1 A numerical approach for delamination.....  | 142 |
| 7.2.2 Test-case description and FEM model.....  | 143 |
| 7.3 Numerical results.....  | 148 |

|   |     |
|---|-----|
| 7.3.1 Stiffened panel delamination under mechanical loading.....  | 149 |
| 7.3.2 Stiffened panel delamination under thermo-mechanical coupled field....  | 153 |
| 7.3.3 Comparison of Stiffened panel delamination with and without considering<br>coupled effect of thermal residual stresses and axial loading..... | 155 |
| 7.4 Conclusion.....   | 158 |
| <b>Chapter 8: Conclusion and Future Scope</b>   |     |
| 8.1 Conclusion.....   | 161 |
| 8.1.1 General conclusion.....   | 162 |
| 8.1.2 Specific conclusion.....  | 163 |
| 8.2 Future Scope.....   | 166 |
