List of Figures		**i**
Preface		**iv**
Chapter 1	**Introduction**	**01**
§1.1	Dynamical Systems	01
	▪ 1.1.1 Types of Dynamical Systems	01
§1.2	Stability Theory	03
	▪ 1.2.1 Equilibrium points of a system	03
	▪ 1.2.2 Stability of the system	04
	▪ 1.2.3 Lyapunov First Method	06
	▪ 1.2.4 Lyapunov Second Method	06
§1.3	Chaos	07
	▪ 1.3.1 Definition of chaos	08
	▪ 1.3.2 Attractor and strange attractor	09
	▪ 1.3.3 The Lyapunov Exponent	09
	▪ 1.3.4 Chaos in fractional order systems	11
§1.4	Chaos Synchronization	11
	▪ 1.4.1 Types of synchronization	12
§1.5	Fractional Calculus	20
	▪ 1.5.1 Applications	21
	▪ 1.5.2 Fractional Derivatives	24
	▪ 1.5.3 Leibniz Rule	29
	▪ 1.5.4 Fractional differential equation	29

§1.6	Delay differential equations ▪ 1.6.1 Existence and uniqueness of a solution: Method of steps ▪ 1.6.2 Numerical solution of a DDE ▪ 1.6.3 Stability of delay differential equations	31 33 34 34
§1.7	Methodology ▪ 1.7.1 Active control method ▪ 1.7.2 Nonlinear control method ▪ 1.7.3 Homotopy Analysis Method	35 35 36 37
§1.8	Numerical Methods ▪ 1.8.1 Runge-Kutta Method for delay differential equations ▪ 1.8.2 Adams-Bashforth-Moulton Method	38 39 41
Chapter 2	**Combined synchronization of time-delayed chaotic systems with uncertain parameters**	**43**
§2.1	Introduction	43
§2.2	Problem formulation	44
§2.3	Nonlinear Control Method	46
§2.4	Systems' descriptions ▪ 2.4.1 Double delay Rossler system ▪ 2.4.2 Advanced Lorenz system ▪ 2.4.3 Time delay Liu system ▪ 2.4.4 Time delay Chen system	47 47 49 51 53
§2.5	Combined synchronization among double delay Rossler, advanced Lorenz and time delay Liu systems with uncertain parameters	55
§2.6	Combined synchronization among double delay Rossler, advanced Lorenz, time delay Liu and time delay Chen systems with uncertain parameters	60

§2.7	Numerical simulation and results	64
§2.8	Conclusion	65
Chapter 3	**Combination-Combination phase synchronization among non-identical fractional order complex chaotic systems via nonlinear control**	**67**
§3.1	Introduction	67
§3.2	Problem formulation and method ▪ 3.2.1 Problem Formulation ▪ 3.2.2 Nonlinear control method	69 69 71
§3.3	Systems' descriptions ▪ 3.3.1 Fractional order Complex Lorenz system ▪ 3.3.2 The fractional order complex T-system ▪ 3.3.3 Fractional order Complex Lu system ▪ 3.3.4 Fractional order Complex Chen system	72 72 74 76 78
§3.4	Combination-Combination phase synchronization between fractional order complex chaotic systems using nonlinear control method	80
§3.5	Numerical simulation and results	84
§3.6	Conclusion	91
Chapter 4	**Triple compound synchronization among eight chaotic systems with external disturbances via nonlinear approach**	**93**
§4.1	Introduction	93
§4.2	Problem formulation of triple compound synchronization	96
§4.3	Systems' descriptions ▪ 4.3.1 Lorenz chaotic system	101 101

	▪ 4.3.2 Rossler chaotic systems ▪ 4.3.3 Lu chaotic system ▪ 4.3.4 Qi chaotic system ▪ 4.3.5 T-system ▪ 4.3.6 Newton-Leipnik chaotic system ▪ 4.3.7 Liu chaotic system ▪ 4.3.8 Chen chaotic system	103 104 106 107 109 110 112
§4.4	Triple compound synchronization among chaotic systems with external disturbances via nonlinear approach	113
§4.5	Numerical simulation and results	120
§4.6	Conclusion	123
Chapter 5	**An analytical algorithm for fractional (1+1) dimensional nonlinear Boussinesq equation by the homotopy analysis method**	**125**
§5.1	Introduction	125
§5.2	The basic idea of the Homotopy analysis method	127
§5.3	Solution procedure by HAM	129
§5.4	Results and discussion	133
§5.5	Conclusion	142
Bibliography		**143**
List of Publications		**157**
