

# Table of Contents

Acknowledgment	<b>i-ii</b>
Contents	<b>iii-vi</b>
List of Tables	<b>vii</b>
List of Figures	<b>viii-xi</b>
Acronyms and symbol	<b>xii</b>
Preface	<b>xiii-xv</b>
<b>Chapter-1 Introduction and literature review</b>	<b>1-44</b>
1.1 Introduction	1
1.2 Aim and objectives of the work	2
1.3 Thesis structure	2
1.4 Biomaterials	7
1.4.1 Biomaterials for Bone Tissue Engineering Scaffolds	13
1.4.2 Essential features of biomaterials	16
1.5 Bioactive Materials	18
1.6 Biocompatibility	19
1.7 Restorative biomaterials	21
1.8 Bioinert materials	21
1.9 Bioceramics materials	21
1.10 Preparation of SBF	24
1.11 Bioactive glass	24
1.12 Hydroxyapatite	30
1.13 Bioactive Composites	33
1.14 Bioactive Coating	36
1.15 Significance of metals or alloys as biomaterials	38
1.16 Dental Alloys	43
<b>Chapter-2 Material and Methods</b>	<b>45-54</b>
2.1 Preparation of Bioglass	45
2.2 Production of HA	46
2.3 Preparation of biocomposites	47
2.4 Thermal Analysis	48
2.5 X-ray diffraction analysis	49
2.6 Preparation of SBF	50

2.7	Fourier transform infrared (FTIR) spectroscopy	51
2.8	pH measurement	52
2.9	Surface morphology of biocomposite sample by SEM and EDS	52
2.10	Physical and Mechanical Properties measurement	53
<b>Chapter-3</b>	<b>In vitro bioactivity and physical-mechanical properties of HA based 45S5 bio-composites</b>	<b>55-67</b>
3.1	Introduction	55
3.2	Material and Methods	55
3.2.1	Preparation of Bioglass	55
3.2.2	Production of HA	56
3.2.3	Preparation of BG/HA composites	57
3.3	Results and Discussion	57
3.3.1	Differential Thermal Analysis (DTA/TGA) of Bioactive Glass composite	57
3.3.2	Phase analysis	58
3.3.3	SEM analysis of bioactive biocomposite samples	60
3.3.4	pH behavior in SBF	62
3.3.5	Mechanical Properties	63
3.3.5.1	Degradation of compressive strength of biocomposite during in vitro test	63
3.3.5.2	Elastic properties of Bioglass and HA reinforcement of biocomposites	65
3.4	Conclusions	67
<b>Chapter-4</b>	<b>Study of In-vitro bioactivity, physical and mechanical properties of BG/HA/TiO<sub>2</sub> based biocomposites</b>	<b>68-85</b>
4.1	Introduction	68
4.2	Material and Methods	69
4.2.1	Preparation of Bioglass	69
4.2.2	Production of HA	70
4.2.3	Preparation of BG/HA/TiO <sub>2</sub> composites	70
4.3	Results and Discussion	71
4.3.1	Differential Thermal Analysis (DTA)	71
4.3.2	X-Ray Diffraction (XRD) patterns of biocomposite	72

4.3.3	FTIR assessment	74
4.3.4	Surface morphology of biocomposite	76
4.3.5	pH behaviour of biocomposite	78
4.3.6	Density, Compressive Strength and Hardness of biocomposites	80
4.3.7	Degradation of compressive strength of biocomposite during in vitro test	81
4.3.8	Elastic properties of HA and TiO <sub>2</sub> reinforcement of biocomposites	83
4.4.	Conclusions	84
<b>Chapter-5</b>	<b>Preparation, In-Vitro Bioactivity And Mechanical Properties of Reinforced 45S5 Bioglass Composite With HA-ZrO<sub>2</sub> Powders</b>	<b>86-99</b>
5.1	Introduction	86
5.2	Material and Methods	88
5.2.1	Selection of composition	88
5.2.2	Synthesis of BG-HA-ZrO <sub>2</sub> composites	89
5.3	Results and Discussion	89
5.3.1	XRD analysis of biocomposite	89
5.3.2	Transmission FTIR analysis of biocomposite	91
5.3.3	pH analysis of biocomposite samples	94
5.3.4	SEM and EDS analysis of biocomposite sample after soaking in SBF	95
5.3.5	Mechanical properties of BHZ biocomposites	97
5.4.	Conclusions	99
<b>Chapter-6</b>	<b>Investigating in-vitro bioactivity, magnetic and mechanical properties of Iron and Cobalt Oxide reinforced (45S5-HA) biocomposite</b>	<b>100-119</b>
6.1	Introduction	100
6.2	Material and Methods	103
6.2.1	Preparation of biocomposites	103
6.3	Results and Discussion	105
6.3.1	Differential thermal analysis (DTA) / Thermogravimetry Analysis (TGA)	105

6.3.2	XRD analysis of biocomposites	106
6.3.3	In vitro bioactivity of bioactive glasses by FTIR spectrometry	109
6.3.4	Magnetic properties of biocomposites	112
6.3.5	pH change during immersion	113
6.3.6	SEM and EDX analysis of biocomposites	115
6.3.7	Mechanical Properties of biocomposites	117
6.4	Conclusions	118
<b>Chapter-7</b>	<b>Physical, mechanical and bioactivity study of bioglass-hydroxyapatite-titania-niobium pentoxide composites for biomedical applications</b>	<b>120-138</b>
7.1	Introduction	120
7.2	Material and Methods	123
7.2.1	Preparation of biocomposites	123
7.3	Results and Discussion	124
7.3.1	Differential thermal analysis (DTA) / Thermogravimetry Analysis (TGA)	124
7.3.2	X-ray diffraction	126
7.3.3	Fourier Transform Infrared spectroscopy analysis	128
7.3.4	pH measurement	130
7.3.5	SEM and EDS Analysis of bioomposites	131
7.3.6	Atomic Force Microscope Analysis	133
7.3.7	Physical and Mechanical Measurement	134
7.4	Conclusions	136
7.5	Comparison of mechanical properties of biocomposites	137
<b>Chapter-8</b>	<b>Summary and Future Work</b>	<b>139-141</b>
	<b>References</b>	<b>142-154</b>
