

## List of Tables

	Page No.
<b>Table 1.1</b> The biological properties of materials used in bone tissue engineering	<b>14</b>
<b>Table 1.2</b> Application of ceramics as implant	<b>23</b>
<b>Table 1.3</b> Types of tissue attachment to biomaterials	<b>23</b>
<b>Table 2.1</b> Composition of Bioglass and Bio-composite (BC1, BC2, BC3,BC4)	<b>47</b>
<b>Table 2.2</b> The ions concentration of SBF solution and human blood plasma (mM/litre)	<b>51</b>
<b>Table 3.1</b> Composition of Bioglass and Bio-composite (BC1, BC2, BC3, BC4)	<b>57</b>
<b>Table 3.2</b> Density ( $\rho$ ), longitudinal velocity ( $V_L$ ) and transverse velocity ( $V_T$ ), Young's modulus, Shear modulus, Bulk modulus and Poisson's ratio of biocomposites	<b>63</b>
<b>Table 4.1</b> Composition of Bio-composite (BGHATi1, BGHATi2, BGHATi3, BGHATi4)	<b>71</b>
<b>Table 4.2</b> Density ( $\rho$ ), longitudinal velocity ( $V_L$ ), transverse velocity ( $V_T$ ), young's modulus, Shear modulus, Bulk modulus and Poisson's ratio of biocomposites	<b>80</b>
<b>Table 5.1</b> Composition of Bioglass and Biocomposites (BHZ1, BHZ2, BHZ3, BHZ4)	<b>88</b>
<b>Table 5.2</b> FTIR spectra bands of BHZ1, BHZ2, BHZ3, BHZ4 sample	<b>93</b>
<b>Table 6.1</b> Composition of Bio-composite (BGHAFeCo1, BGHAFeCo2, BGHAFeCo3, BGHAFeCo4)	<b>104</b>
<b>Table 6.2</b> Magnetic parameters and crystal size of BGHAFeCo4 samples	<b>113</b>
<b>Table 7.1</b> Composition of Bioglass and Biocomposites (GHATiNb1, GHATiNb2, GHATiNb3, GHATiNb4)	<b>124</b>
<b>Table 7.2</b> FTIR spectra bands of GHATiNb1, GHATiNb2, GHATiNb3, GHATiNb4 sample	<b>130</b>
<b>Table 7.3</b> Mechanical properties of BC, GHATi, BHZ, BGHAFeCo, GHATiNb biocomposite.	<b>138</b>
