CONTENTS	**i-v**
LIST OF FIGURES	**vi-xi**
LIST OF SYMBOLS	**xii-xiii**
PREFACE	**xiv-xvii**
CHAPTER-1: INTRODUCTION AND LITERATURE REVIEW	**1-29**
1.1 Mathematical modeling	**1-2**
1.1.1 What is mathematical modeling?	**1**
1.1.2 Objective of mathematical modeling	**1-2**
1.2 Thermoelasticity theory	**3-12**
1.2.1 Classical coupled theory of thermoelasticity	**4-6**
1.2.2 Drawbacks of Fourier's law and its modifications	**7-8**
1.2.3 Development of non-Fourier heat conduction models	**8-12**
1.3 Generalized thermoelasticity theories	**12-17**
1.3.1 Lord-Shulman's theory or extended thermoelasticity (ETE) theory	**12**
1.3.2 Temperature-rate-dependent thermoelasticity (TRDTE) theory	**12-13**
1.3.3 Green and Naghdi's theory of thermoelasticity of type I, II and III	**13-14**
1.3.4 Thermoelasticity theory with dual phase-lags (DPLTE)	**14-15**
1.3.5 Thermoelasticity with three phase-lags (TPLTE)	**15**
1.3.6 Quintanilla's theory of thermoelasticity	**15-17**
1.4 Fractional order thermoelasticity theory	**17-19**
1.5 Thermoelasticity theory with memory dependent derivatives	**19-20**
1.6 Stochastic processes and it applications in thermoelasticity	**20-22**
1.7 Literature review	**22-28**
1.8 Objective of the present thesis	**29**
CHAPTER-2: A DETAILED STUDY ON RESPONSES OF FOUR HEAT CONDUC-TION MODELS FOR AN AXISYMMETRIC PROBLEM OF COUPLED THERMOE-	

LASTIC INTERACTIONS INSIDE A THICK PLATE **31-56**

2.1 Introduction **31-33**

2.2 Governing equations **33-35**

2.3 Formulation of the problem **35-39**

2.3.1 Boundary conditions **38-39**

2.4 Solution of the problem **39-49**

2.4.1 Laplace and Hankel transforms **39-41**

2.4.2 Inversion of the Hankel transform **42-43**

2.4.3 Inversion of the Laplace transform **43-46**

2.4.4 Discussion on analytical results **46-49**

2.5 Numerical results and discussion **49-55**

2.6 Conclusions **55-56**

CHAPTER-3: AN INVESTIGATION ON COUPLED THERMOELASTIC INTERACTIONS IN A THICK PLATE DUE TO AXI-SYMMETRIC TEMPERATURE DISTRIBUTION UNDER AN EXACT HEAT CONDUCTION WITH A DELAY **57-84**

3.1 Introduction **57-58**

3.2 Governing equations **58-60**

3.3 Formulation of the problem **60-63**

3.4 Boundary conditions **63-64**

3.5 Solution of the problem **64-74**

3.5.1 Laplace and Hankel transforms **64-66**

3.5.2 Inversion of the Hankel transform **66-68**

3.5.3 Inversion of Laplace transform **68-72**

3.5.4 Discussion on analytical results **72-74**

3.6 Numerical examples **74-77**

3.7 Conclusions **77-84**

CHAPTER-4: AN INVESTIGATION ON RESPONSES OF THERMO-MECHANICAL LOAD INSIDE A INFINITELY EXTENDED THICK PLATE UNDER THERMOELASTICITY WITH MEMORY DEPENDENT DERIVATIVES **85-107**

4.1 Introduction **85-86**

4.2 Governing equations **86-89**

4.3 Formulation of the problem **89-92**

4.3.1 Boundary conditions **92**

4.4 Solution of the problem **93-97**

4.4.1 Laplace and Hankel transforms **93-95**

4.4.2 Inversion of the Hankel transform **95-97**

4.5 Numerical results and discussion **97-106**

4.6 Conclusions **106-107**

CHAPTER-5: EFFECTS OF STOCHASTIC BOUNDARY CONDITIONS ON WAVE PROPAGATION IN THERMOELASTIC MEDIUM **109-165**

5.1 Investigation of a problem of an elastic half space subjected to stochastic temperature distribution at the boundary **109-140**

5.1.1 Introduction **109-111**

5.1.2 Formulation of the problem **111-114**

5.1.3 Solution of the problem in the Laplace transform domain **114-116**

5.1.4 Stress distributions in physical domain **116-121**

5.1.4.1 Deterministic stress distribution **116-117**

5.1.4.2 Stochastic stress distribution **117-122**

5.1.5 Temperature distributions in physical domain **122-124**

5.1.5.1 Deterministic temperature distribution **122-123**

5.1.5.2 Stochastic temperature distribution **123-124**

5.1.6 Displacement distributions in physical domain **124-126**

5.1.6.1 Deterministic displacement distribution **124-125**

5.1.6.2 Stochastic displacement distribution **125-126**

5.1.7 Numerical results and discussion **126-139**

5.1.8 Conclusions **139-140**

5.2 Investigation on effects of stochastic loading at the boundary under thermoelasticity with two relaxation parameters **141-165**

5.2.1 Introduction **141**

5.2.2 Formulation of the problem **142-143**

5.2.3 Solution of the problem in the Laplace transform domain **143-146**

5.2.4 Temperature distributions in physical domain **146-152**

5.2.4.1 Deterministic temperature distribution **147-147**

5.2.4.2 Stochastic temperature distribution **147-152**

5.2.5 Stress distributions in physical domain **152-154**

5.2.5.1 Deterministic stress distribution **152-153**

5.2.5.2 Stochastic stress distribution **153-154**

5.2.6 Numerical results **154-164**

5.2.7 Discussion and conclusions **164-165**

CHAPTER-6: AN INVESTIGATION ON A TWO DIMENSIONAL PROBLEM OF MODE-I CRACK IN A THERMOELASTIC MEDIUM **167-190**

6.1. Introduction **167-169**

6.2 Formulation of the problem **169-172**

6.3 Solution in the Laplace and Hankel transform domain **172-176**

6.4 Boundary conditions and dual integral equation formulation **176-180**

6.5 Solution of the dual integral equations **180-182**

6.6 Numerical results and discussions **182-189**

6.7 Conclusion **189-190**

CHAPTER-7: SUMMARY OF THE THESIS AND SCOPE FOR FUTURE WORK **191-195**

7.1 Summary of the thesis **191-194**

7.1.1 Part-I: Behavior of fields variables due to thermoelastic interactions inside a plate **191-192**

7.1.2 Part-II: The behavior of field variables due to thermoelastic interactions using memory dependent derivatives **192-193**

7.1.3 Part-III: The behavior of field variables due to thermoelastic interactions under stochastic thermo-mechanical loads at the boundary **193**

7.1.4 Part-IV: The behavior of field variables near Mode-I crack in thermoelastic medium **194**

7.2 Future scope for research work **194-195**

REFERENCES **197-223**

APPENDICES **225-233**

LIST OF PUBLICATIONS **235-237**
