CHAPTER 1	01–30
INTRODUCTION AND LITERATURE REVIEW	
1.1 Antennas	01
1.1.1 Emergence of antennas	01
1.1.2 Microstrip technology and antennas	04
1.1.3 Dielectric resonator antennas (DRAs)	05
1.1.4 Bandwidth enhancement techniques for DRAs	06
1.1.5 Applications of DRAs	06
1.1.6 Recent developments pertaining to DRAs	07
1.2 Numerical simulation software	16
1.3 Low Temperature Co-fired Ceramic (LTCC) technology	18
1.4 Material requirements	19
1.4.1 Sintering Temperature	19
1.4.2 Dielectric constant	20
1.4.3 Tan Delta	21
1.4.4 Temperature coefficient of resonant frequency	21
1.4.5 Temperature coefficient of dielectric constant	21
1.4.6 Chemical compatibility with the electrode material	22
1.4.7 Coefficient of thermal expansion	22
1.4.8 Thermal conductivity	23
1.5 Recent advancements in LTCC materials	23
1.5.1 Ceramic systems	23
1.5.2 Glass + ceramic systems	27
1.5.3 Glass-ceramic systems	28
CHAPTER 2	31–34
OBJECTIVES OF THE WORK	
2.1 Material preparation and characterisation	33
2.2 DRA design and simulation studies	33
2.3 Antenna fabrication and measurement	34

CHAPTER 3	35–52
EXPERIMENTAL METHODS	
3.1 Material synthesis	35
3.1.1 Raw materials	35
3.1.2 Preparation of LMAP ceramics	35
3.1.3 Preparation of MgO–B ₂ O ₃ –SiO ₂ glass-ceramics	37
3.1.4 Preparation of glass-added Barium strontium titanate	38
3.2 Material characterisation	39
3.2.1 Thermal behaviour analysis	39
3.2.2 Phase and microstructure	40
3.2.3 Density	40
3.2.4 Dielectric measurements	41
3.3 DRA design and simulation	43
3.3.1 Basics of DRA design	43
3.3.2 DRA design steps in HFSS	45
3.4 Antenna fabrication	46
3.4.1 Requirement	46
3.4.2 Fabrication steps	48
3.5 Antenna measurement	48
3.5.1 Antenna measurement site	48
3.5.2 Antenna measurement steps	51

CHAPTER 4	53–72
SYNTHESIS AND CHARACTERIZATION OF Li ₂ O–(2-3x)MgO–(x)Al ₂ O ₃ –P ₂ O ₅ (LMAP) CERAMIC FOR LTCC APPLICATION	
4.1 Introduction	53
4.2 Material synthesis	54
4.3 Results and discussion	57
4.3.1 Thermo-gravimetric and differential thermal analysis	57
4.3.2 Sintering and densification behaviour	59
4.3.3 Phase analysis	61
4.3.4 Microstructure	62
4.3.5 Dilatometry	67
4.3.6 Thermal conductivity	69
4.3.7 Dielectric characterisation	69
4.4 Summary	71

CHAPTER 5	73–85
INVESTIGATION ON THE DUAL SEGMENT CYLINDRICAL DIELECTRIC RESONATOR ANTENNA (DS–CDRA) ON LMAP–LTCC SUBSTRATE	
5.1	Introduction 73
5.2	Material description 74
5.3	Antenna design and fabrication 74
5.4	Results and discussion 77
5.4.1	Parametric study: Reflection coefficient – frequency characteristics 77
5.4.2	Near field distributions 80
5.4.3	Radiation patterns and gain 81
5.4.4	Comparison with other antennas available in literature 83
5.5	Summary 85
CHAPTER 6	87–105
INVESTIGATION ON THE 4–ELEMENT COMPOSITE TRIANGULAR DIELECTRIC RESONATOR ANTENNA (4–CTDRA)	
6.1	Introduction 87
6.2	Material description 89
6.3	Antenna design and fabrication 89
6.4	Results and discussion 92
6.4.1	Parametric study: Reflection coefficient – frequency characteristics 92
6.4.2	Near field distributions 97
6.4.3	Radiation patterns and gain 101
6.4.4	Comparison with other antennas available in literature 104
6.5	Summary 105
CHAPTER 7	107–122
SYNTHESIS AND CHARACTERIZATION OF MgO–B ₂ O ₃ –SiO ₂ (MBS) GLASS-CERAMIC FOR LTCC APPLICATION	
7.1	Introduction 107
7.2	Material synthesis 109
7.3	Experimental results 110
7.3.1	Differential thermal analysis 110
7.3.2	Density 111
7.3.3	Phase analysis 112
7.3.4	Microstructure 116
7.3.5	Dilatometry analysis 116
7.3.6	Dielectric characterisation 117
7.4	Summary 121

CHAPTER 8	123–136
AN APERTURE COUPLE DUAL SEGMENT RECTANGULAR DIELECTRIC RESONATOR ANTENNA ON GLASS-CERAMIC LTCC SUBSTRATE	
8.1 Introduction	123
8.2 Material description	125
8.3 Antenna design	125
8.4 Results and discussion	128
8.4.1 Parametric study: Reflection coefficient – frequency characteristics	128
8.4.2 Near field distributions	129
8.4.3 Radiation patterns and gain	132
8.4.4 Comparison with other antennas available in literature	135
8.5 Summary	135
 CHAPTER 9	 137–141
CONCLUSION AND FUTURE SCOPE	
9.1 Summary and conclusion	137
9.2 Future scope	140
References	143–156
List of Publications	157
