

# TABLE OF CONTENTS

S. No.	Topic	Page No.
	<b>Acknowledgements</b>	i-iii
	<b>Contents</b>	iv-viii
	<b>List of Symbols</b>	ix-x
	<b>List of Figures</b>	xi-xv
	<b>List of Tables</b>	xvi-xvii
	<b>Preface</b>	xviii-xx
<b>1</b>	<b>INTRODUCTION</b>	<b>1-8</b>
1.1	Gout	1
1.2	Hyperuricemia	2
1.3	Purine metabolic pathway	3
1.4	Treatment of hyperuricemia	5
1.5	Uricase based treatment	6
1.6	Sources of uricase	7
1.8	Aim and objective of the present study	8
<b>2</b>	<b>REVIEW OF LITRATURE</b>	<b>9-21</b>
2.1	Uricase (Urate oxidase EC 1.7.3.3)	09
2.2	Sources of uricase	09
2.3	Production of microbial uricase	13
2.4	Mode of uricase action	15
2.5	Measurement of uricase activity	15
2.6	Effect of pH on uricase production	19
2.7	Effect of temperature on uricase production	19
2.8	Media design and optimization	19
2.9	Purification of uricase	21
2.10	Characterization of purified protein	24
2.11	Molecular mass of uricase	25
2.12	Physico-chemical properties of purified uricase	25
2.13	<i>In vivo</i> study of uricase	27
2.13.1	Hyperuricemia: Uricase deficient animals	27

2.13.2	Selection of Inhibitor and animal	28
2.13.3	Effects of drugs in Hyperuricemia: Uricase deficient animals	29
<b>3</b>	<b>MATERIALS AND METHODS</b>	<b>30-57</b>
3.1	Materials	30
3.1.1	Chemicals	30
3.1.2	Microorganisms procured from culture collections	30
3.1.3	Equipments/ Instruments	30
3.1.4	Media	31
3.1.4.1	Nutrient agar	31
3.1.4.2	Luria Burtani	32
3.1.4.3	YEPD medium	32
3.1.4.4	Uricase production medium	33
3.1.5.	Softwares used	33
3.2.	Analytical methods	34
3.2.1.	Biomass estimation	34
3.2.2.	Determination of protein content	34
3.2.3.	Uricase activity	34
3.3	Agar plate assay	35
3.4.	Uricase production in shake flask	35
3.5.	Effect of uric acid conc. on uricase production in shake flask	36
3.6.	Effect of pH on uricase production	36
3.7.	Effect of temperature on uricase production	36
3.8.	Effect of Agitation speed (rpm) on uricase production	37
3.9.	Effect of pH and temperature on uricase activity	37
3.10.	<i>In vitro</i> degradation study of uric acid	37
3.11.	Effect of metal ions on uricase activity	38
3.12.	Production enhancement of uricase <i>B. cereus</i> GHMS	38
3.12A	Optimization of Physical parameters	38
3.12B	Effect of Inducers on uricase production	39
3.12C	Effect of Surfactants on uricase production	39
3.12D	Optimization of nutrient medium components	40
3.12DI	Taguchi methodology	40

3.12DII	Design of experiments (DOE): Phase I	41
3.12DIII	Submerged fermentation experiments: Phase II	41
3.12DIV	Analysis of experimental data: Phase III	42
3.12DV	Validation: Phase IV	42
3.13	Scale-up in 7.5 L bioreactor	42
3.13a	Scale-up and validation of <i>Bc-uricase</i> production in a bioreactor	42
3.14	Purification of uricase from <i>Bacillus cereus</i>	44
3.14a	Precipitation using Ammonium sulphate	44
3.14b	Determination of isoelectric point	46
3.14c	Ion-Exchange Chromatography (IEC)	46
3.14d	Size-Exclusion Chromatography (SEC)	47
3.15.	Molecular characterization of <i>Bc-uricase</i>	48
3.15a	In-gel trypsin digestion	49
3.15b	MALDI-TOF MS analysis	49
3.15c	Phylogenetic analysis of <i>Bc-uricase</i>	50
3.15d	Secondary structure analysis of <i>Bc-uricase</i>	50
3.15e	Structure modeling, energy minimization and validation of <i>Bc-uricase</i>	50
3.16	Physico-chemical properties of the purified uricase	51
3.16a	Effect of pH on uricase activity and stability	51
3.16b	Determination of optimum temperature and stability	51
3.17	<i>In vivo</i> applications of uricase in hyperuricemia	52
3.17a	Hyperuricemia: Uricase deficient mice model	53
3.17b	<i>In vivo</i> study of purified uricase	55
3.17c	Immunogenicity study of uricase	56
<b>4</b>	<b>RESULTS AND DISCUSSION</b>	<b>58-109</b>
4.1	Selection of uricase producer	58
4.1.1	Plate assay method	58
4.1.2	Shake flask study for high producing strain	60
4.1.2.1	Effect of uric acid concentration on uricase production	61
4.1.2.1a	Effect of uric acid on cell growth	61
4.1.2.2	Effect of pH on uricase production in shake flask	62

4.1.2.3	Effect of temperature on uricase production	63
4.1.2.4	Effect of shaking speed (rpm) on uricase production	64
4.2	Effect of pH and temperature on uricase activity of crude extract	66
4.3	<i>In vitro</i> degradation study of UA	68
4.4	Effect of Metal Ions on Uricase activity	69
4.5	Uricase production by <i>Bacillus cereus</i> GHMS	71
4.5A	Effect of physical parameters on uricase production	71
4.5B	Effect of Inducers on uricase production	72
4.5C	Stability of uricase	74
4.5D	Effect of surfactants on uricase production	76
4.6	Optimization of media by Taguchi DOE method	77
4.6.1	Selection of carbon and nitrogen source for uricase production	77
4.6.2	Fermentation parameters, their main effects and % severity	78
4.6.3	Analysis of Variance (ANOVA)	83
4.6.4	Optimized process parameters and validation	84
4.7	Scale up and validation of <i>Bc</i> -uricase production in a bioreactor	87
4.8	Purification of <i>Bc</i> -uricase	88
4.9	Kinetic study	91
4.9a	Effect of uric acid concentration on rate of reaction	91
4.9b	Lineweaver-Burk plot	92
4.9c	Eadie-Hoffstee plot	93
4.9d	Hanes-Woolf plot	93
4.10	Molecular characterization of uricase	94
4.10a	MALDI- TOF Analysis	94
4.10b	Phylogenetic analysis of <i>Bc</i> -uricase	96
4.10c	Secondary structure determination of <i>Bc</i> -uricase	98
4.10d	Homology modeling and structure validation of uricase	99
4.11	Physico-chemical properties of purified uricase	103
4.11a	Effect of pH on uricase activity and stability	103
4.11b	Effect of temperature on uricase activity and stability	104

4.12	Applications of purified uricase	107
4.12a	<i>In vivo</i> applications of uricase in hyperuricemia	107
4.12b	Immunogenicity test of uricase	108
<b>5</b>	<b>CONCLUSIONS</b>	<b>110-112</b>
<b>6</b>	<b>FUTURE WORK</b>	<b>113</b>
<b>7</b>	<b>REFERENCES</b>	<b>114-137</b>
<b>8</b>	<b>List of papers accepted</b>	
<b>9</b>	<b>Copies of manuscripts/ reprints of the papers accepted</b>	
<b>10</b>	<b>Ethical Approval Letter for Animal study</b>	
<b>11</b>	<b>Personal Profile</b>
