

LIST OF TABLES

S. No.	Table	Page No.
1.1	Concentration of uric acid with age and sex	4
2.1	Major sources of uricase production	8
2.2	Uricase Sources and activity	14
2.3	Purification of uricase from microbial source	18
3.1	List of microbial cultures procured from different culture collections	26
3.2	The nutrient composition for the revival and storage of microbial cultures	27
3.3	The LB medium composition for the revival and storage of microbial culture	28
3.4	The YEPD composition for the revival and storage of yeast culture	29
3.5	The nutrient composition for the production of uricase enzyme	29
3.6	Levels of variables used in Taguchi experimental design.	38
4.1	Zone of degradation (cm) of uric acid	54
4.2	Uricase production under optimum physical conditions	60
4.3	Selection of carbon source for media optimization	73
4.4	Selection of nitrogen source for media optimization	73
4.5	L-18 Orthogonal array of Taguchi experiment design for uricase production by <i>Bacillus cereus</i> .	75
4.6	Main effects of selected factors	76
4.7	Estimated interactions of severity index for different factors.	77
4.8	Analysis of Variance (ANOVA).	78

4.9	Optimum of process variables and their contribution	85
4.10	Tabular representation of Fermentation results	88
4.11	Purification of <i>Bc-uricase</i> .	91
4.12	Kinetic parameters determination	95
