

Acknowledgement

When you spend a significant amount of your time working and studying, your colleague soon become part of your extended family. In this sense I was very lucky to meet so many wonderful strangers. It would be impossible to be brief and at the same time correctly acknowledge everyone who, in one way or another, supported me during my PhD. The past few years have been an amazing experience of academic, professional, and personal growth, which would not have been as great if it was not for so many people that were there for me along the way. I would like to express my whole hearted thanks to each and everyone who have helped me to complete my research work, in one way or other.

*First and foremost I thank my supervisor **Dr. Anuradha Banerjee**, for her excellent guidance, kindness, inspiration, motivation and one of the most important her friendly nature. I consider myself lucky for being her first student as a researcher. I thankfully acknowledge the helps that I received from **Prof. Subir Das**, my co-supervisor as advisor. Both have been great role models and have taught me very much, not just research-wise, but professionally as well. I am deeply indebted to both of them for their stimulated suggestions and continuous encouragement as without their keen supervision and sagacious guidance it would not have been possible for me to complete the work.*

*Into the species of this dissertation, I am very grateful to my RPEC committee members **Prof. Santwana Mukhopadhyay** (Department of Mathematical Sciences, IIT (BHU), Varanasi), **Prof. Rajeev Srivastava** (Head of the Department of Computer Science IIT (BHU) Varansi). Their comments and the discussions I had with them during each RPEC seminar helped me to improve this document. I appreciate their time and commitment. I would also like to express my sincere thanks to the Head of the Department, **Prof. L. P. Singh** and **Prof. Rekha Srivastava** (Convenor, DPGC) and all the professors of the Department of Mathematical Sciences, IIT (BHU), Varanasi. I was very lucky to have interactions on a regular basis with most of them and they were of great support along the way. I am also thankful to **Prof. K.N. Rai**, Department of Mathematical Sciences, IIT(BHU), Varanasi, for his constant encouragement and moral support during my work. I feel great pleasure to thank all the non-teaching staffs of our department for their help during my research work.*

*Discussions with **Prof. G. P. Singh**, Department of Statistics, BHU, Varanasi, during a workshop on 'Understanding Statistics by MS-Excel and SPSS- July, 2016' were fruitful to me. I acknowledge my deep sense of gratitude to all the faculty members of Department of Mathematics, Banaras Hindu University, Varanasi, and all faculty members of Department of Science and Technology, Kashi Vidyapith Varanasi. The acknowledgment will not be complete until I present my deep gratitude to my respective teachers of my schooling time, especially **Mr. Sudhir Upadhyay** and **Mr. Sanjay Upadhyay**. They are*

ideal to me. Thanks for the financial support, given by the MHRD, India, under the teaching assistant ship at IIT BHU.

I can not express my feelings to my elder brothers **Mr. Pawan Kumar Gupta** and **Mr. Bikas Gupta** for their encouragement during the tough times of my research work. I extended my deep thanks to my younger sister **Miss. Neha Gupta** for making so many sacrifices and helping me in all respect to complete my work; during my hosteller days in IIT (BHU) she sorely missed my care.*

At the end but not the least I would like to thank to invisible support of someone (God, Grandparents) who continually encouraged me when I feel upset during my research work.
